Process Strategy and Analysis

DISCUSSION QUESTIONS

1. Many processes at manufacturing facilities involve customer contact. Internal customers would include those employees whose operation(s) are subsequent. Quality Control could be considered an internal customer as could design engineering or sales. Quality Control, design engineering, marketing, sales and other organizations represent the customer at various stages of any process. Customer contact can be very high, especially between production and engineering and production and quality control.
2. Some students may see this as a difference in competitive priorities. Others may see a difference in management styles. Ritz-Carlton empowers their employees and the local restaurant does not seem to empower. Ritz-Carlton believes that by having employees treat customers and other employees with respect, customer service is enhanced. A restaurant that does not allow employees to resolve a customer issue may not see enhanced customer service. The restaurant may believe that the to-go customer will be better satisfied with fast and accurate orders. The in-store customer gets the chips and salsa to utilize the time while waiting for an order to be prepared. The to-go customer has already placed that order and it is ready when the customer arrives at the pickup window.
3. eBay has considerable arrival and request variability, because its customers do not want service at the same time or at times necessarily convenient to the company. They have request variability, seeking to buy and sell an endless number of items. Their process strategy allows significant customer involvement. Their customers

Making Lean and Continuous Improvement Work

Darren Walsh, 2024-12-30 Despite the popularity of lean and continuous improvement around the world most organisations and their leaders struggle to make improvement work Many are trying to cope with day to day business issues They bury their heads in the work as they either give up on trying to improve or are floundering as they keep trying new initiatives to improve with little success Most lean thinking and improvement publications focus on the use of improvement tools but never really get to the core of why organisations are not seeing the real results from these techniques and lean thinking as an improvement strategy They talk about what to do but not about the common problems you can expect along the way and how to navigate these and create a fundamental change in how the business works Making Lean and Continuous Improvement Work will help solve this problem and help leaders build a solid foundation to making lean and continuous improvement work in their business Through numerous examples and detailed case studies the book shows how business leaders managers and frontline supervisors can make lean and continuous improvement techniques work increasing consistency and getting more work done in less time
