

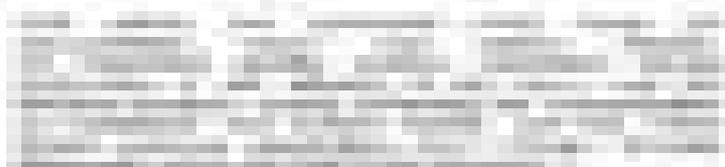

### Figure 20-10: The Business Cycle and the Real Business Cycle Model

(a) Business Cycle

The business cycle is a series of fluctuations in the level of aggregate output and employment. The cycle is divided into four phases: expansion, peak, recession, and trough. The expansion phase is characterized by a steady increase in output and employment. The peak is the point at which output and employment reach their maximum. The recession phase is characterized by a steady decrease in output and employment. The trough is the point at which output and employment reach their minimum. The cycle then repeats as output and employment begin to rise again.
