Marketing analytics is an exciting field to study, and there are numerous emerging opportunities for students at the undergraduate level and particularly at the master's level. We live in a global, highly competitive, rapidly changing world that is increasingly influenced by digital data, expanded analytical capabilities, information technology, social media, artificial intelligence, and many other recent developments. We believe this book will become the premier source for new and essential knowledge in data analytics, particularly for situations related to marketing decision-making that can benefit from marketing analytics, which is likely 80 percent of all challenges faced by organizations. *The Evolution of Management Thought*, Daniel A. Wren, Arthur G. Bedeian, 2023-09-27. The new edition of the canonical text on the history and development of management thought. Far more than a chronicle of the historical development of modern management's many roots, the newly released ninth edition of *The Evolution of Management Thought* by Daniel A. Wren and Arthur G. Bedeian is a fascinating telling of how ideas about the nature of work, the nature of human beings, and the nature of organizations have changed throughout history. Its methodology is analytic, synthetic, and interdisciplinary. It is analytic in that it examines the backgrounds, experiences, and beliefs of people who made significant contributions to management thinking. It is synthetic in that it weaves developmental trends, social movements, and environmental forces into a conceptual framework for understanding how management thinking has evolved within and across generations. It is interdisciplinary in that it draws insights from economics, history, political science, psychology, and sociology to explain why management thinking has developed as it has. The authors trace the intellectual history of modern management thought as an activity and as an academic discipline in a way that makes reading *The Evolution of Management Thought* a thoroughly enjoyable encounter. Designed for upper-level and graduate courses, this new edition further cements *The Evolution of Management Thought's* place as the standard text in the field of management history for more than half a century. *Natural Language Processing in Action, Second Edition*, Hobson Lane, Maria Dyshel, 2025-02-25.
