

Exam #1 Study Guide

Chapter One:

- Anatomy- the study of the structure of the human body and its parts
 - Physiology- the study of the function of the human body and its parts
 - Structure/Function = Anatomy/Physiology
 - The structure of organs and parts determine the function
 - If a structure changes, its function might also; directly dependent
- EX: Hemoglobin molecules
- Structure = flat, concave, circular
 - This allows for oxygen to be close to the surface of a cell, so it can pass through the blood stream in and away from the heart
 - Function = to carry oxygen
 - Function is to carry oxygen so the flat/circular structure makes sense
- *If the structure is mutated, sickle-cell anemia results***
- function is directly affected b/c of a change in structure
- Levels of Structural Organization
 - Subatomic Particles: protons, neutrons, electrons that make up cells
 - Atom: tiny particles that make up chemicals EX: hydrogen, carbon
 - Molecule: particles consisting of atoms EX: water, glucose
 - Macromolecule: large particles consisting of molecules EX: DNA, protein
 - Organelle: functional part of a cell EX: mitochondria, lysosome
 - Cell: basic unit of structure and function EX: muscle, nerve, or blood cell
 - Tissue: layer or mass of cells with specific function EX: adipose tissue
 - Organ: group of different tissues with a function EX: heart, kidney, liver
 - Organ System: group of organs w/ common function EX: digestive system
 - Organism: composed of organ systems interacting EX: human
- *To know what is going on w/ the body as a whole, you must know how each part is functioning and interacting!***
- Organ Systems
 - Integumentary: protection, thermoregulation, sensory reception, vitamin D production
 - Skeletal: framework, protection, attachment site, storage of inorganic salts, support and movement, produce blood cells (bone marrow)
 - Muscular: movement, body heat, maintain posture
 - Nervous: control center, detects changes in body and reacts if needed using nerve impulses
 - Endocrine: integration and coordination of organ function through hormone impulses

Study Guide for Human Information Processing Ross Bott,Allen Munro,2013-10-22 Study Guide for Human Information Processing is designed to accompany Lindsay and Norman s Human Information Processing HIP Problems and questions range from ones that are relatively easy to several that are somewhat difficult This variation is intentional the easy exercises explain and demonstrate the principles introduced in HIP and the harder problems challenge students to apply those principles to new areas Much of this study guide relies on the process of model building to review and expand on the principles in the text Models will be proposed to explain experimental results By using models the goal is to help students develop the ability to find truly significant patterns of results This ability involves a critical attitude toward any experiment For many of the models proposed a joint search is conducted with students to discover the fatal flaws in the models Students are also encouraged to propose models of their own and to design experiments to test them

How To Use This Book Introduction Congratulations on your decision to become an actuary The path ahead is long and challenging but the rewards are great Actuaries are among the most respected and well paid professionals and their work has a profound impact on society This book is designed to help you prepare for Exam P the first of several exams that you will need to pass in order to become an actuary Exam P is focused on probability theory which is a foundation of actuarial science Without a solid understanding of probability it will be difficult to succeed in subsequent exams and in your career as an actuary Problem solving vs Conceptual Understanding Many test takers prepare for Exam P by focusing solely on mechanical problem solving techniques without taking the time to develop a deep understanding of the underlying concepts While this approach may be sufficient to pass Exam P it can be detrimental in the long run Actuaries are not just problem solvers they are also critical thinkers who must be able to apply their knowledge to real world situations Our goal in this book is to help you develop both problem solving skills and a strong conceptual foundation in probability theory We

believe that the best way to achieve this is by solving high quality problems that require both mathematical and critical thinking We have selected a set of sample problems from the Society of Actuaries SOA that we believe represent the core concepts of probability theory The Structure of the Book This book is divided into two parts The first part covers the fundamental concepts of probability theory including the basic rules of probability random variables distributions and expected values The second part contains a set of high quality sample problems that cover a range of topics in probability theory Each problem is fully explained and solved in detail so you can follow the logic and understand the reasoning behind the solution This book is not designed to help you achieve a perfect score on Exam P Instead our goal is to help you develop a deep understanding of probability theory that will serve you well throughout your career as an actuary If you study the material in this book carefully and work through the sample problems you should have no problem achieving a passable score on Exam P and laying a strong foundation for future exams Conclusion We wish you all the best in your journey to become an actuary We know that it will be a long and challenging road but we believe that the rewards are worth it With hard work perseverance and a deep understanding of probability theory you can achieve your goals and make a positive impact on the world Good luck
