

## Traditional Security Checklist Version 1, Release 3

### Summary of Changes:

This third release of the Traditional Security Checklist provides updates to all existing rules using the identical rule format from Version 1, Release 2. The framework of the previous rules has not been altered. Hence the content and flow of the checklist does not change significantly. For instance most of the rule titles remain unchanged; however, individual checks and fixes (AKA: requirements) have been modified to incorporate changes in supporting/referenced Federal or Department of Defense (DoD) level publications. Additionally some checks and fixes have been modified to remedy problems or to incorporate recommendations received from Command Cyber Readiness Inspection (CCRI) reviewers and/or organizational customers via the STIG Customer Support issue resolution system. A few rule titles were modified to more accurately reflect the intent of the requirements being evaluated by the rule. Default severity levels for each rule remain unchanged.

There is only one new rule increasing the total from 151 to 152 rules. The added rule is:  
Rule Title: Environmental IA Controls - Emergency Power, STIG ID: EC-03.03.02, Rule ID: SV-6119r1\_rule, Vuln ID: V-61629, Severity: CAT II

The most significant changes to the checklist include:

1. Updated references are listed under the Vulnerability Discussion field for each rule.
2. The primary reference for Protected Distribution System (PDS) rules has been updated from the obsolete NSITSS1 7003 (PDS) to the CNSSI 7003 (PDS), dated September 2015
3. The primary reference for the Personnel Security (PERSEC) Program rules has been updated from the obsolete DoD 5200.2-R Personnel Security Program to the DoD Manual 5200.02, Procedures for the DoD Personnel Security Program (PSP), dated 3 April 2017
4. The primary reference for the National Industrial Security Program (NISPOM) has been updated from the February 2006, Incorporating Change 1 March 28, 2013 to the NISPOM February 2006, Incorporating Change 2, 18 May 18 2016
5. The primary reference for the DoD Information Security Program: Overview, Classification, and Declassification, Volume 1 has been updated to include Change 1, dated 4 May 2018
6. The primary reference for the DoD Information Security Program: Controlled Unclassified Information (CUI), Volume 4 has been updated to include Change 1, dated 9 May 2018. Note that the recently released DoD INSTRUCTION 5200.48 Controlled Unclassified Information (CUI) on 6 March 2020 is not included as a reference. This reference cancels the DoD Manual 5200.01, Volume 4, "DoD Information Security Program: Controlled Unclassified Information," February 24, 2012, as amended and dramatically changes the CUI program. As such the DoD is taking a "phased" approach to program implementation. The next Traditional Security Checklist update will include new/updated rules for implementation of the new CUI program. Until that time the existing rules may be continued to be used for evaluation of organizational CUI program compliance. Some flexibility will be needed and granted as the process to transition to the new program requirements evolves.
7. Additional Severity Level Overrides have been provided for requirements in numerous STIG rules, allowing for compensatory measures and other mitigations to reduce the impact level of findings during Command Cyber Readiness Inspections (CCRIs).
8. Reference STIG Rule:  
Rule Title: Monitor Screens - Disable Access by CAC or Token Removal, or Lock Computer via Ctrl/Alt/Del, STIG ID: IS-08.01.02, Rule ID: SV-42292r3\_rule, Vuln ID: V-31993, Severity: CAT I

# Framework Security Checklist Version 1 Release 3 22

**Fei Fan ,Siqin Wang**

## **Framework Security Checklist Version 1 Release 3 22:**

**Forensic Mental Health** Gerald Landsberg, Amy Smiley, 2001      **Handbook of Systems Engineering and Risk Management in Control Systems, Communication, Space Technology, Missile, Security and Defense Operations** Anna M. Doro-on, 2022-09-27 This book provides multifaceted components and full practical perspectives of systems engineering and risk management in security and defense operations with a focus on infrastructure and manpower control systems missile design space technology satellites intercontinental ballistic missiles and space security While there are many existing selections of systems engineering and risk management textbooks there is no existing work that connects systems engineering and risk management concepts to solidify its usability in the entire security and defense actions With this book Dr Anna M Doro on rectifies the current imbalance She provides a comprehensive overview of systems engineering and risk management before moving to deeper practical engineering principles integrated with newly developed concepts and examples based on industry and government methodologies The chapters also cover related points including design principles for defeating and deactivating improvised explosive devices and land mines and security measures against kinds of threats The book is designed for systems engineers in practice political risk professionals managers policy makers engineers in other engineering fields scientists decision makers in industry and government and to serve as a reference work in systems engineering and risk management courses with focus on security and defense operations      *Multilevel Medical Security Systems and Big Data in Healthcare: Trends and Developments, volume II* Fei Fan , Siqin Wang, 2025-09-15 As society continues to develop the importance of people s health is becoming increasingly prominent It is imperative to speed up the construction of a multilevel medical security system with the goal of effectively addressing people s concerns about illness and continuously improving the quality of health In addition as an important production factor in the information age health care big data has profoundly changed the health service model comprehensively enhancing the ability to handle public health emergencies improving the quality and effectiveness of health care services and promoting the sharing of medical resources for the benefit of all which has strongly contributed to the leapfrog development of health care Moreover the construction of high quality health insurance data is of great significance to better benefit the people and the public Therefore it has become a research goal to actively explore the use of health insurance data to empower and build institutional mechanisms to help the pharmaceutical industry innovate and develop      Computer Security Handbook Arthur E. Hutt, Seymour Bosworth, Douglas B. Hoyt, 1988      **Managing Digital Records in Africa** Mpho Ngoepe, 2022-05-23 Managing Digital Records in Africa draws on the research work of the InterPARES Trust ITrust project that investigated interrelated archival issues focusing on legal analysis infrastructure trust authentication and education within the African context This research focused book provides a legal analysis and systematic assessment of how African institutions manage digital records in four countries i e Botswana Kenya South Africa and Zimbabwe It also examines the extent to which records

are managed using Internet based applications trust in such records and digital record authentication to support the auditing process Finally it provides a curriculum analysis in digital records at institutions of higher learning in 38 African countries The book s case studies illustrate the threads of discussion which span the ITrust domains of legislation infrastructure authentication trust and education in archives and records management The book can be used as a premier reference source by private and public organizations researchers educators archivists records managers and postgraduate students to make informed decisions about digital records records management systems cloud based services authenticating records and identifying universities on the continent that offer archival programmes The book may also find expression to practitioners in other fields such as law and auditing
