Fundamentals Of Object Tracking:

Fundamentals of Object Tracking, 2011 Kalman filter particle filter IMM PDA ITS random sets The number of useful object tracking methods is exploding But how are they related How do they help to track everything from aircraft missiles and extra terrestrial objects to people and lymphocyte cells How can they be adapted to novel applications Fundamentals of Object Tracking tells you how Starting with the generic object tracking problem it outlines the generic Bayesian solution It then shows systematically how to formulate the major tracking problems maneuvering multi object clutter out of sequence sensors within this Bayesian framework and how to derive the standard tracking solutions This structured approach makes very complex object tracking algorithms accessible to the growing number of users working on real world tracking problems and supports them in designing their own tracking filters under their unique application constraints The book concludes with a chapter on issues critical to the successful implementation of tracking algorithms such as track initialization and merging

Fundamentals of Object Tracking, 2011-07-28 Introduces object tracking algorithms from a unified recursive Bayesian perspective along with performance bounds and illustrative examples **Artificial Intelligence Trends for Data Analytics Using Machine Learning and Deep Learning Approaches** K. Gayathri Devi, Mamata Rath, Nguyen Thi Dieu Linh, 2020-10-07 Artificial Intelligence AI when incorporated with machine learning and deep learning algorithms has a wide variety of applications today This book focuses on the implementation of various elementary and advanced approaches in AI that can be used in various domains to solve real time decision making problems The book focuses on concepts and techniques used to run tasks in an automated manner It discusses computational intelligence in the detection and diagnosis of clinical and biomedical images covers the automation of a system through machine learning and deep learning approaches presents data analytics and mining for decision support applications and includes case based reasoning natural language processing computer vision and AI approaches in real time applications Academic scientists researchers and students in the various domains of computer science engineering electronics and communication engineering and information technology as well as industrial engineers biomedical engineers and management will find this book useful By the end of this book you will understand the fundamentals of AI Various case studies will develop your adaptive thinking to solve real time AI problems Features Includes AI based decision making approaches Discusses computational intelligence in the detection and diagnosis of clinical and biomedical images Covers automation of systems through machine learning and deep learning approaches and its implications to the real world Presents data analytics and mining for decision support applications Offers case based reasoning **Device-Free Object Tracking Using Passive Tags** Jinsong Han, Wei Xi, Kun Zhao, Zhiping Jiang, 2014-11-21 This SpringerBrief examines the use of cheap commercial passive RFID tags to achieve accurate device free object tracking It presents a sensitive detector named Twins which uses a pair of adjacent passive tags to detect uncooperative targets such as intruders Twins leverages a newly observed phenomenon called critical state that is caused by interference among passive

tags The author expands on the previous object tracking methods which are mostly device based and reveals a new interference model and their extensive experiments for validation A prototype implementation of the Twins based intrusion detection scheme with commercial off the shelf reader and tags is also covered in this SpringerBrief Device Free Object Tracking Using Passive Tags is designed for researchers and professionals interested in smart sensing localization RFID and Internet of Things applications The content is also useful for advanced level students studying electrical engineering and computer science

Handbook Assisted and Automated Driving Hermann Winner, Klaus C. J. Dietmayer, Lutz Eckstein, Meike Jipp, Markus Maurer, Christoph Stiller, 2026-03-19 This open access book explains in detail systems and technologies for assisted and automated driving It also provides an overview of the limitations of such systems concerning development processes and test tools This description covers today s advanced driver assistance systems with environment perception in passenger cars commercial vehicles and motorcycles This includes functional principles as well as embodiments of the components required for this purpose such as sensors actuators mechatronic subsystems and actuating elements Additionally data fusion concepts environment representations and user friendly designs of the human machine interface between the assistance system and driver are presented New priorities are also presented concerning the development of automated driving Although automated driving is based on the technology of advanced driver assistance systems removing humans from the responsibility of driving induces entirely new challenges that also go beyond series technology The variety of necessary innovative approaches is presented in example applications The content Fundamentals of Advanced Driver Assistance System Development Virtual Development and Test Environments for ADAS Test Methods Sensors for ADAS Data Fusion and Environment Representation Digital Infrastructure Actuation for ADAS Human Machine Interfaces for ADAS ADAS on Guidance and Navigation Level Automated Driving The target groups Automotive development and application engineers Students of automotive electrics electronics mechatronics Students of mechanical engineering automotive technology Students of electronics informatics information technology The Editors Prof Dr rer nat Hermann Winner headed the Department of Automotive Engineering at the Technical University of Darmstadt FZD until 2021 Prof Dr Ing Klaus Dietmayer is Director of the Institute of Measurement Control and Microtechnology at the University of Ulm Prof Dr Ing Lutz Eckstein is Director of the Institute for Automotive Engineering ika at RWTH Aachen University Prof Dr Meike Jipp is Divisional Board Member Energy and Transport German Aerospace Center DLR Prof Dr Ing Markus Maurer is Head of the Institute for Control Engineering at the Technical University of Braunschweig Prof Dr Ing Christoph Stiller is Head of the Institute of Measurement and Control Technology MRT at the Karlsruhe Institute of Technology

Application of AI and ML in image and video processing Dr. Ravi Mishra , Dr. Latika Pinjarkar , Dr. Priti Nilesh Bhagat , Dr. Rushikesh Bankar, 2025-05-31 This book explores the transformative role of Artificial Intelligence and Machine Learning in image and video processing covering techniques like object detection facial recognition video analytics and deep learning It highlights

real world applications across industries offering insights into advanced algorithms and future trends shaping visual data interpretation

Next-Generation Computational Intelligence: Trends and Technologies Shubham Mahajan, José Braga de Vasconcelos, 2025-09-26 Next Generation Computational Intelligence Trends and Technologies explores the transformative potential of advanced computational intelligence CI methods and their application across modern industries With the rapid evolution of artificial intelligence machine learning and deep learning frameworks this book provides a comprehensive overview of emerging CI trends and their role in shaping intelligent decision making systems automation and data driven innovation Contributors from academia and industry present cutting edge research on neural networks fuzzy systems evolutionary algorithms and hybrid intelligent systems emphasizing real world applications in domains such as healthcare finance smart manufacturing cybersecurity and intelligent transportation The book also addresses challenges in scalability interpretability and sustainability offering critical insights for researchers practitioners and policy makers As part of the Information Systems Engineering and Management series this volume serves as an essential resource for graduate students researchers engineers and professionals seeking to harness the power of next generation CI to drive digital transformation and competitive advantage

Springer Handbook of Augmented Reality Andrew Yeh Ching Nee, Soh Khim Ong, 2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to augmented reality AR technology its numerous applications and its intersection with emerging technologies This book traces the history of AR from its early development discussing the fundamentals of AR and its associated science The handbook begins by presenting the development of AR over the last few years mentioning the key pioneers and important milestones It then moves to the fundamentals and principles of AR such as photogrammetry optics motion and objects tracking and marker based and marker less registration The book discusses both software toolkits and techniques and hardware related to AR before presenting the applications of AR This includes both end user applications like education and cultural heritage and professional applications within engineering fields medicine and architecture amongst others The book concludes with the convergence of AR with other emerging technologies such as Industrial Internet of Things and Digital Twins The handbook presents a comprehensive reference on AR technology from an academic industrial and commercial perspective making it an invaluable resource for audiences from a variety of backgrounds
