Second International Conference, Technologies of Information and Communications in Education and Training Ahmed Ferchichi, Hadhemi Achour, Jamil Itmazi, 2013 Proceedings 2nd International Conference on Information Technologies for Education and Training Hammamet Tunisia November 2013 *Analytical Methods for Network Congestion Control* Steven H. Low, 2022-05-31 The congestion control mechanism has been responsible for maintaining stability as the Internet scaled up by many orders of magnitude in size speed traffic volume coverage and complexity over the last three decades In this book we develop a coherent theory of congestion control from the ground up to help understand and design these algorithms We model network traffic as fluids that flow from sources to destinations and model congestion control algorithms as feedback dynamical systems We show that the model is well defined We characterize its equilibrium points and prove their stability We will use several real protocols for illustration but the emphasis will be on various mathematical techniques for algorithm analysis Specifically we are interested in four questions 1 How are congestion control algorithms modelled 2 Are the models well defined 3 How are the equilibrium points of a congestion control model characterized 4 How are the stability of these equilibrium points analyzed For each topic we first present analytical tools from convex optimization to control and dynamical systems Lyapunov and Nyquist stability theorems and to projection and contraction theorems We then apply these basic tools to congestion control algorithms and rigorously prove their equilibrium and stability properties A notable feature of this book is the careful treatment of projected dynamics that introduces discontinuity in our differential equations Even though our development is carried out in the context of congestion control the set of system theoretic tools employed and the process of understanding a physical system building mathematical models and analyzing these models for insights have a much wider applicability than to congestion control

Intelligent Systems and Applications Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-07 Gathering the Proceedings of the 2018 Intelligent Systems Conference IntelliSys 2018 this book offers a remarkable collection of chapters covering a wide range of topics in intelligent systems and computing and their real world applications The Conference attracted a total of 568 submissions from pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process after which 194 including 13 poster papers were selected to be included in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have made it possible to tackle many problems more effectively This branching out of computational intelligence in several directions and the use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue for reporting on cutting edge innovations and developments This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope Readers are sure to find the book both interesting and valuable as it presents state of the art intelligent methods and techniques for solving real world

problems along with a vision of future research directions *AI Models for Blockchain-Based Intelligent Networks in IoT Systems* Bharat Bhushan, Arun Kumar Sangaiah, Tu N. Nguyen, 2023-06-08 The goal of this book is to explore various security paradigms such as Machine Learning Big data Cyber Physical Systems and Blockchain to address both intelligence and reconfigurability in various IoT devices The book further aims to address and analyze the state of the art of blockchain based intelligent networks in IoT systems and related technologies including healthcare sector AI can ease optimize and automate the blockchain based decision making process for better governance and higher performance in IoT systems Considering the incredible progress made by AI models a blockchain system powered by intelligent AI algorithms can detect the existence of any kind of attack and automatically invoke the required defense mechanisms In case of unavoidable damage AI models can help to isolate the compromised component from the blockchain platform and safeguard the overall system from crashing Furthermore AI models can also contribute toward the robustness and scalability of blockchain based intelligent IoT networks The book is designed to be the first choice reference at university libraries academic institutions research and development centers information technology centers and any institutions interested in integration of AI and IoT The intended audience of this book include UG PG students Ph D scholars of this fields industry technologists young entrepreneurs professionals network designers data scientists technology specialists practitioners and people who are interested in exploring the role of AI and blockchain technology in IoT systems

A University for the 21st Century 20 Years Later James J. Duderstadt, 2017 University presidents are expected to draw upon their experiences to draft a book suggesting possible futures for higher education Since my term of office ended in 1996 as the new century approached it was natural to label this assignment as A University for the 21st Century a book that was awarded the Alice Beeman Award of CASE the Council on Advancement and Support of Education in 2001 Although this effort was heavily influenced by my experience in serving the University of Michigan as dean provost and president during the 1980s and 1990s I attempted to paint a broader picture of American higher education writ large Of course universities have a remarkable constancy in roles such as teaching and scholarship in organizations such as schools colleges and departments and in cultures such as academic freedom and tenure Indeed as Clark Kerr has noted in his famous quote CHI ... Conference Proceedings, 2003 The Aesthetics of the "beyond" Jianguo Chen, 2009 This book is about an alternative mode of reading thinking and representing the intricacies of human experience in Chinese literature of the late twentieth century which the author calls the aesthetics of the beyond It investigates how contemporary Chinese writers by means of dynamic interface of literary practice and cultural philosophical considerations engage the reader in critical reflection on and aesthetic appreciation of the complexity of human conditions By studying the beyond in its various manifestations the semiotics of human embodiment the discourse of the phantasm the politics of nostalgia with regard to origin and center and the metaphysics of death in the writings of some major contemporary Chinese writers the book explores the ways in which the beyond is constructed as a new paradigm of critical

thinking in literary aesthetic and philological terms in which its discursive strategies structural features and aesthetic possibilities are presented and in which varied literary tropes are used in an attempt to unravel human experience in all its aspects Jianguo Chen is a Professor of Chinese literature at the University of Delaware
