web answer see answers below this question tests your understanding of the variables which effect the resistance of a wire the resistance of a wire expressed by the equation $R = \rho \frac{l}{A}$ where ρ is the resistivity of the material l is length of wire and A

is cross sectional area of the wire

electrical resistance lesson notes physics classroom - May 10 2023

web electrical resistance lesson notes learning outcomes what is resistance what variables affect resistance and in what manner do they affect it what is resistance because of collisions of mobile electrons with the atoms and ions of a wire the path of an electron is anything but straight it is a zig zag journey

electric circuits name the physics classroom - Aug 13 2023

web 1 the cause of resistance to the flow of charge within an electrical wire is a mobile charge carriers collide with atoms of the resistor b mobile charge carriers have mass possess inertia which resists their motion c the electric field that causes charge flow diminishes with distance
