Product Lifecycle Management to Support Industry 4.0 Paolo Chiabert, Abdelaziz Bouras, Frédéric Noël, José Ríos, 2018-12-08 This book constitutes the refereed post conference proceedings of the 15th IFIP WG 5.1 International Conference on Product Lifecycle Management PLM 2018 held in Turin Spain in July 2018. The 72 revised full papers presented were carefully reviewed and selected from 82 submissions. The papers are organized in the following topical sections: building information modeling, collaborative environments and new product development, PLM for digital factories and cyber physical systems, ontologies and data models, education in the field of industry 4.0, product service systems and smart products, lean organization for industry 4.0, knowledge management and information sharing, PLM infrastructure and implementation, PLM maturity, implementation and adoption, 3D printing and additive manufacturing and modular design and products and configuration and change management. *Advances in Information Systems Development* Nearchos Paspallis, Marios Raspopoulos, Chris Barry, Michael Lang, Henry Linger, Christoph Schneider, 2018-03-27 This volume features a collection of papers on emerging concepts, significant insights, novel approaches and ideas in information systems development. It examines advances in information systems development in general and their impact on the development of new methods, tools and management. The book draws on selected invited papers from the 26th International Conference on Information Systems Development ISD held in Larnaca, Cyprus, September 6-8, 2017. The revised and expanded papers present research that focuses on methods, tools and management in information systems development. These issues are significant as they provide the basis for organizations to identify new markets, support innovative technology deployment and enable mobile applications to detect, sense, interpret and respond to the environment. [Prototyping of User Interfaces for Mobile Applications](#) Benjamin Bähr, 2017-03-14 This book investigates processes for the prototyping of user interfaces for mobile apps and describes the development of new concepts and tools that can improve the prototype-driven app development in the early stages. It presents the development and evaluation of a new requirements catalogue for prototyping mobile app tools that identifies the most important criteria such tools should meet at different prototype development stages. This catalogue is not just a good point of orientation for designing new prototyping approaches but also provides a set of metrics for comparing the performance of alternative prototyping tools. In addition, the book discusses the development of Blended Prototyping, a new approach for prototyping user interfaces for mobile applications in the early and middle development stages and presents the results of an evaluation of its performance showing that it provides a tool for teamwork-oriented creative prototyping of mobile apps in the early design stages. **Mobile Prototyping with Axure 7** Will Hacker, 2013-11-25 This book is a step-by-step tutorial which includes hands-on examples and downloadable Axure files to get you started with mobile prototyping immediately. You will learn how to develop an application from scratch and will be guided through each and every step. If you are a mobile-centric developer, designer or someone who would like to take their Axure prototyping skills to the next level and start designing and testing mobile prototypes, this book is ideal for you. You

should be familiar with prototyping and Axure specifically before you read this book
