UML by Example Ghinwa Jalloul, 2004-01-19 This is a step by step introduction to object oriented software development It is suitable for teaching and for self study by practising software engineers seeking to add rigour to their techniques Seven complete case studies are included along with several smaller examples derived from small software projects developed for and delivered to real users These examples make use of a bridge process which presents a systematic approach for developing analysis models and unfolding these incrementally and iteratively through to design models and implementation The process could be viewed as one example of unified software development and has the potential of being scalable to large software problems It also provides a model for organising deliverables obtained throughout different phases of the software life cycle These case studies provide a medium for experimental use and act as templates that can be tailored by readers to fit their specific needs and circumstances

Architectural Framework for Web Development and Micro Distributed Applications Rodriguez, Guillermo,2023-04-17 In recent years we have ushered in a new age where applications

will become smaller distributed JavaScript laden microservices infused and utilize the hardware of the client to operate A new paradigm has been forced upon us by the large search providers and because of this we can now leverage them to help our applications obtain influence where our applications become the voice of authority on the internet and consequently help our organizations reap the benefits of mass adoption To better understand this we must first consider the history that has taken us to where we find ourselves Architectural Framework for Web Development and Micro Distributed Applications helps readers to come to an understanding of how the indexing domain may be leveraged by this new wave of JavaScript applications that have been termed micro distributed applications and by whose creation and implementation will allow the enterprise to reap the benefit of influence by the existing search systems that the masses utilize It helps to fill in the picture of the evolution that has occurred and will continue to occur in web development whereby the new breed of applications will become JavaScript laden and highly distributed and whereby the businesses that implement them will stand a chance to win the indexing race and consequently stand to win the attention of the masses Covering topics such as distributed systems search engine optimization and software as a service this premier reference source is a dynamic resource for web developers students and educators of higher education software developers technical personnel IT managers computer scientists librarians researchers and academicians
