Ramantswana,Saulo P. S. Guerra,José Mauro S. da Silva,2026-03-16 This book describes the various technologies used in silviculture with a special focus on newer technologies that have been adopted over the past two decades in plantation forestry practised in the Southern Hemisphere Historically innovations in silviculture technology have been slow to develop however over the past two decades new technologies have been invented and adopted to deal with labour efficiency and quality challenges This book presents a comprehensive introduction to modern silviculture technology as well as explains the environment and operations within which these technologies are used In the context of this book the focus is on industrial plantation forests grown in a range of Southern Hemisphere countries mainly South Africa

and Brazil with a specific focus on the technologies used in establishing and tending eucalypts pine and wattle species This book examines modern technologies used to produce trees from a nursery including managing residues on the site preparing the soil fertilising and irrigating the plants It then examines the technologies available for after planting including those that can assist in eliminating weeds pruning thinning and fire protection systems This book also discusses digital technologies available to manage silvicultural operations By the end of this book readers will have a strong understanding of the range of technologies available the impact of those technologies and their capabilities and limitations This book will be of great use to students of silviculture and forestry as well as professionals working in the forestry industry
