## **Analyzing Health Equity Using Household World Bank:**

**Analyzing Health Equity Using Household Survey Data** Adam Wagstaff, Owen O'Donnell, Eddy van Doorslaer, Magnus Lindelow, 2007-11-02 Have gaps in health outcomes between the poor and better off grown Are they larger in one country than another Are health sector subsidies more equally distributed in some countries than others Are health care payments more progressive in one health care financing system than another What are catastrophic payments and how can they be measured How far do health care payments impoverish households Answering questions such as these requires quantitative analysis This in turn depends on a clear understanding of how to measure key variables in the analysis such as health outcomes health expenditures need and living standards It also requires set quantitative methods for measuring inequality and inequity progressivity catastrophic expenditures poverty impact and so on This book provides an overview of the key issues that arise in the measurement of health variables and living standards outlines and explains essential tools and methods for distributional analysis and using worked examples shows how these tools and methods can be applied in the health sector The book seeks to provide the reader with both a solid grasp of the principles underpinning distributional analysis while at the same time offering hands on guidance on how to move from principles to practice *The World Bank Research Program, 2005-2007*, 2008 This pocket sized reference on key environmental data for over 200 countries includes key indicators on agriculture forestry biodiversity energy emission and pollution and water and sanitation The volume helps establish a sound base of information to help set priorities and measure progress toward environmental sustainability goals

Distributional Cost-Effectiveness Analysis Richard Cookson, Susan Griffin, Ole F. Norheim, Anthony J. Culyer, 2020-09-30 Distributional cost effectiveness analysis aims to help health care and public health organisations make fairer decisions with better outcomes Whereas standard cost effectiveness analysis provides information about total costs and effects distributional cost effectiveness analysis provides additional information about fairness in the distribution of costs and effects who gains who loses and by how much It can also provide information about the trade offs that sometimes occur between efficiency objectives such as improving total health and equity objectives such as reducing unfair inequality in health This is a practical guide to a flexible suite of economic methods for quantifying the equity consequences of health programmes in high middle and low income countries The methods can be tailored and combined in various ways to provide useful information to different decision makers in different countries with different distributional equity concerns The handbook is primarily aimed at postgraduate students and analysts specialising in cost effectiveness analysis but is also accessible to a broader audience of health sector academics practitioners managers policymakers and stakeholders As well as offering an overview for research commissioners users and producers the book includes systematic technical guidance on how to simulate and evaluate distributions with accompanying hands on spreadsheet training exercises and discussions about how to handle uncertainty about facts and disagreement about values and the future challenges facing this young and rapidly evolving field
