Creating value through Operations Management Operations Management provides readers with a comprehensive framework for addressing operational process and supply chain issues This text uses a systemized approach while focusing on issues of current interest **Organizational Ethics and Stakeholder Well-Being in the Business Environment** Sean Valentine, 2014-04-23 This book explores organizational ethics focusing on principles and norms that influence business ethics employee management and external interactions It examines the link between ethics and stakeholder well being aiming to guide future research and highlight benefits for companies and employees **Integrated Management of Processes and Information** Kenneth A. Shaw, 2013-10-15 Many process management books focus on manufacturing applications A few discuss services applications and occasionally some comment on the information processes outside of the normal information technology IT function When a business seeks to improve the processes it uses in order to provide efficiency and cost savings to a product or service that business needs to consider its manufacturing service and information handling processes together because they are not independent This book has two goals First to help business practitioners integrate their management of manufacturing or service processes with information processes and second to provide business schools with a textbook that can be used for a basic process management course to precede or accompany the typical operations management course Because information handling approaches vary considerably with organizational size both large and small business approaches are discussed This discussion is focused on basic concepts rather than specific technical aspects like what type of information hardware to be used One chapter will discuss the considerations necessary when adding information process management to enterprise resource planning ERP statistical process control SPC and supply chain logistics approaches from both large and small business perspectives *BUSINESS MANAGEMENT* Vitayanti Fattah, Hasmin Tamsah, Agus Frianto, Muhammad Rizal, Santorry, T Meldi Kesuma, Marusaha MP Siahaan, Ika Suhartanti Darmo, This book contains discussions about the fundamental principles strategies and practical applications of business management It is designed to serve as a comprehensive guide for students educators and professionals who seek a deeper understanding of how businesses operate and thrive in a dynamic and competitive environment This book still has many shortcomings in its preparation Therefore we really hope for criticism and suggestions for the improvement and perfection of this book in the future *Modeling of a logistics network for wood flows from by-products and cascade utilization* Mohammad Sadegh Taskhiri, 2016-05-27 Waste Wood and wood by products have the potential to become attractive

alternative sources of raw materials Their efficient use is important due to the rising demand and limited supply of forest wood Cascade utilization is gaining interest as a strategy to bridge the gap between rising wood demand and fresh wood availability However the economic and environmental impacts of a cascading system for wood based products are not fully known In this work an investigation is conducted to determine the consequences of cascade utilization for the economic and environmental performance of logistics networks for wood flows Two case studies in Lower Saxony consider five wood products including medium density fiber MDF oriented strand board OSB particleboard coated paper and wood pellets In the first case study an approach for decision support is developed that consists of a mixed integer linear programming MILP model In the first case study the MILP model is used for minimizing the costs of the logistics network for three scenarios Then the UMBERTO software is applied to determine the quantity of CO₂e of the minimized logistics network In the second case study the MILP model is enhanced using two objective functions as cost and global warming potential GWP are considered simultaneously In this case study it is observed that environmental parameters such as CO₂ emissions can also be implemented in the MILP The utilization of a multi objective optimization model brings new perspectives the trade off between two contradictory objective functions for instance in comparison to the first case study in which CO₂ is calculated as an off line step after logistics costs are minimized

Altholz und Holz Nebenprodukte besitzen das Potenzial attraktive alternative Rohstoffquellen zu werden Ihre effiziente Nutzung ist von hoher Relevanz da die Nachfrage nach Holz steigt und die Versorgung mit Holz aus Wäldern begrenzt ist Um die Lücke zwischen der wachsenden Holz nachfrage und verfügbarkeit zu überbrücken ist die Kaskadennutzung eine Strategie welche zunehmendes Interesse erfährt Allerdings sind die wirtschaftlichen und ökologischen Auswirkungen eines Kaskadensystems für Holzprodukte nicht vollständig bekannt In dieser Arbeit wird eine Untersuchung durchgeführt um die Folgen der Kaskadennutzung auf die Wirtschafts und Umweltleistung von Logistiknetzwerken für Holzströme zu bestimmen Im Rahmen von zwei Fallstudien in Niedersachsen werden fünf Holzprodukte einschließlich mitteldichten Fasern MDF OSB Platten OSB Spanplatten beschichtetem Papier und Holz Pellets betrachtet In der ersten Fallstudie wird ein Ansatz zur Entscheidungsunterstützung entwickelt der aus einem Mixed Integer Linear Programming MILP Modell besteht Das MILP Modell wird zuerst in drei verschiedenen Szenarien zur Minimierung der Logistikkosten angewendet Mithilfe der UMBERTO Software wird anschließend die Menge von CO₂e bestimmt In der zweiten Fallstudie wird das Modell für zwei Zielfunktionen weiterentwickelt und eingesetzt bei denen die Kosten und das Treibhausgaspotenzial gleichzeitig betrachtet werden Diese Fallstudie zeigt dass auch Umweltparameter wie CO₂ Emissionen mit MILP umgesetzt werden können Die Verwendung eines Mehrzieloptimierungsmodells ermöglicht die Betrachtung neuer Perspektiven zum Beispiel den Trade off zwischen zwei widersprüchlichen Zielfunktionen im Vergleich zur ersten Fallstudie in welcher CO₂ Emissionen in einem Offline Schritt nach der Minimierung der Logistikkosten minimiert werden
