today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order *The Lancet*, 1914

Design Recommendations for Intelligent Tutoring Systems: Volume 9 - Competency-Based Scenario Design Anne Sinatra, Arthur C. Graesser, Xiangen Hu, Benjamin Goldberg, Andrew J. Hampton, Joan H. Johnston, 2022-02-02 This book focuses on the topic of competency based scenario design as it relates to Intelligent Tutoring Systems ITSs The current book is the ninth in a series of books that examine key topics in ITSs The chapters in this book specifically relate the work presented to applications for the Generalized Intelligent Framework for Tutoring GIFT Sottolare Brawner Goldberg Sottolare Brawner Sinatra Johnston 2017 GIFT is an open source domain independent service oriented modular architecture for ITSs GIFT has specifically been designed to allow for reusability of the GIFT architecture GIFT tools and instructional content materials Further GIFT has been designed with the goals of reducing the amount of time necessary to author ITSs and reducing the skill level required for the authoring process GIFT can be used to create ITSs that can be distributed both locally on a computer and virtually in the Cloud In addition to creating ITSs GIFT can be used to examine instructional outcomes and conduct research The topic of this book Competency Based Scenario Design is highly relevant to the development of ITSs Scenarios are information rich task problem contexts that are closely aligned with real world situations

that professionals face in their jobs The tasks problems exhibit ecological validity rather than stripped down abstract simplifications Developers of ITSs and other adaptive instructional systems need to have principled guidance on how to design these scenarios An example scenario may be a close match to a particular situation in the past but not be representative of a large range of situations that professionals experience in their job An example scenario may be very realistic but not provide reliable and valid assessments of the learners performance to guide assessments summative formative or stealth Research teams that build high quality scenarios need to include expertise in the targeted profession assessment learning science and computer science The current book brings together experts on ITSs to discuss their work as it applies to Competency Based Scenario Design We believe that this book can be used as a resource for those who have an interest in developing Scenarios for ITSs and who want to learn more about how to do so
