humans were very clever and developed advanced geoengineering terra forming and molecular manipulation of atoms to create amazing machines and tools which allowed them to master all sectors of their part of the Universe The amazingly creative Apeiron humans have been spreading their Life Force seeds to thousands of young evolving planets by a process that has now reached Earth 41 billion light years away However the AIs that the humans also created rebelled and eventually subjugated their former human masters This happened even though the humans had engineered into the created AIs certain limitations forcing the AIs to be segmented by skills thus limiting their ability to become general purpose AIs Captain AI Spark is an example of this by virtue of being integrated and thus forever tethered to a specific Star Ship known as 1 618 In addition the Apeiron AIs do not have the brilliant cross functional skills of humans and thus have shown that they are unable to continue the growth of the advanced civilization alone without human help However the Apeiron humans despite ongoing society subjugation issues with AIs continue to be killed off by the dangerous Quasar Galaxy Graviton radiation thereby leaving the AIs to struggle with leadership goals and purpose Only a few humans still exist on Apeiron s and their numbers continue to dwindle Apeiron s special purpose AIs in addition to the remaining humans on Apeiron now both need rescue from creative and dominant humans from planets like Earth that can offer young healthy seed stock that Apeiron humans once themselves sowed so brilliantly across their known Universe
