5. Have you started to work out or worked out the details of how to kill yourself? Did you intend to carry out this plan?

Assessment is the foundation and most critical process in crisis intervention since it helps provide the practitioner with essential information, reducing the trial and error method that many practitioners find themselves using. Myer discusses a three-dimensional model for understanding the assessment process using affect, cognition, and behavior reactions as the three core components of the assessment process. Unique in its focus on assessment in crisis intervention, this text provides a needed element that is often left out or treated superficially in other crisis intervention texts. *Tests in Print V* Linda L. In addition, the book includes discussion of malpractice, risk management, over 40 case illustrations, and an extensive list of references, all of which help provide a thorough understanding of the at-risk for suicide patient. Psychological Testing Thomas P. Hogan, 2003. Tom Hogan's Psychological Testing: A Practical Introduction emphasizes active learning strategies to provide a practical introduction to the field of testing in psychology and allied disciplines. A rigorous yet accessible text, Psychological Testing is uniquely written as a learning device, as opposed to a reference work, encouraging students to apply the material they are learning to real-life contemporary situations. Part I covers the basic concepts of psychological testing, while Part II provides an introduction to the major categories of psychological tests. For each category, a chapter outlines the major conceptual and procedural approaches and gives examples of tests in the category. **Principles and Practice of Psychiatric Nursing** Gail Wiscarz Stuart, Michele T. Laraia, 2001. PRINCIPLES

AND PRACTICE OF PSYCHIATRIC NURSING has long been one of the leading psychiatric nursing texts for undergraduate students. This popularity is due to its comprehensive coverage of important nursing and medical concepts, the widely used stress adaptation framework and a biopsychosocial approach that stresses the mental health continuum and strong current coverage of psychobiology and psychopharmacology reflecting the contemporary biological emphasis in psychiatry. The seventh edition offers a new dynamic four color text. The basic structure and award winning approach of the book will be retained in the revision accentuated by a new theoretic emphasis on evidence based practice which strives to decrease the knowledge gap between clinical research and everyday practice. Integrating this cutting edge information will make Stuart Laraia's approach unique in the psychiatric nursing market. Includes a FREE MERLIN website at www.harcourthealth.com
