Reliability Data Collection and Use in Risk and Availability Assessment Viviana Colombari,2012-12-06

International cooperation on reliability and accident data collection and processing exchange of experience on actual uses of data and reliability engineering techniques is a major step in realising safer and more efficient industrial systems This book provides an updated presentation of the activities in this field on a worldwide basis

A Tradeoff between the Output and Current Account Effects of Pension Reform Mr.Mario Catalan,Mr.Nicolas E. Magud,2012-12-03

We compare the long term output and current account effects of pension reforms that increase the retirement age with those of reforms that cut pension benefits conditional on reforms achieving similar fiscal targets We show the presence of a policy trade off Pension reforms that increase the retirement age have a large positive effect on output but a small and often negative effect on the current account In contrast reforms that cut pension benefits improve the current account balance but reduce output Mixed pension reforms which extend the working life and cut pension benefits can simultaneously boost output and the current account

An Archaeology of the Bantu Expansion Peter R. Coutros,Jessamy H. Doman,Igor Matonda Sakala,Koen Bostoen,2025-07-22 The Bantu Expansion is one of the most intriguing issues in African history Based on extensive fieldwork in the Democratic Republic of the Congo and laboratory analysis this book provides the most comprehensive up to date and multi proxy account of the first Bantu speakers south of the Congo rainforest This volume begins with state of the art reviews of the archaeological palaeoenvironmental genetic linguistic and oral historical contexts of the Bantu Expansion and includes evidence from over 150 previously unknown archaeological sites with extensive analyses of pottery lithics soil stable isotopes phytoliths charcoal and human remains Seven appendices contain the full metadata radiometric and geographical data for each site and comparative language data The volume concludes with a sweeping interdisciplinary reconstruction of the first Bantu speaking settlers in the Kwilu Kasai region and rethinks how farming climate change and contact with Central African hunter gatherers and Ubangi speakers impacted their lifeworld This book is indispensable for scholars and students of Africa from a wide variety of fields such as archaeology palaeoecology linguistics population genetics history and anthropology and of considerable interest to scientists active in other parts of the world All who think African history matters will find it a valuable source

Computational Chemistry Jerzy Leszczynski,2000 This volume comprises six chapters which explore the development and applications of the methods of computational chemistry The first chapter is on new developments in coupled cluster CC theory The homotopy method is used to obtain complete sets of solutions of nonlinear CC equations The correspondence between multiple solutions to the CCSD CCSDT and full CI equations is established and the applications of

the new approach in modeling molecular systems are discussed The second chapter reviews the computational theory for the time dependent calculations of a solution to the Schrodinger equation for two electrons and focuses on the development of propagators to the solution The next chapter features a discussion on a new self consistent field for molecular interactions SCF MI scheme for modifying Roothaan equations in order to avoid basis set superposition errors BSSE This method is especially suitable for computations of intermolecular interactions Details of the theory alongwith examples of applications to nucleic acid base pair complexes are given This chapter is well complemented by the following chapter which reports the current status of computational studies of aromatic stacking and hydrogen bonding interactions among nucleic acid bases The next chapter reveals the possibility of calculating the kinetics of chemical reactions in biological systems from the first principles The last chapter reviews the results of rigorous ab initio studies of the series of derivatives of methane silane and germane The presented molecular and vibrational parameters complement experimental data for these systems In addition the theoretical approach allows the prediction of the effects of halogeno substitutions on their structures and properties
