Millennial Biology: The National Science Foundation and American Biology, 1975-2005 Donald J. McGraw, 2021-01-25
National Science Foundation NSF is a unique federal agency because it supports scientific research financially but does not engage in scientific work itself Its history is known only in part because the NSF is a vibrant expanding and living entity that makes the final telling of its story impossible Much can be learned from its beginning as well as its component parts If the founding of the NSF in 1950 was couched in an era of physics especially atomic physics certainly by the end of the 20th century and the beginning of the 21st biology was and remains the queen of sciences for the predictable future This book highlights the elite status of America s biological sciences as they were funded affected and to a very real degree interactively guided by the NSF It examines important events in the earlier history of the Foundation because they play strongly upon the development of the various biology directorates Issues such as education applied research medical science the National Institutes of Health the beginnings of biotechnology and other matters are also discussed The New Foundations of Evolution Jan Sapp, 2009-11-05 This book presents a history of microbial evolutionary biology from the 19th century to the present It follows the research of molecular evolutionists who explore the origins of the genetic system and the primary life forms three domains and multiple kingdoms created by mechanisms very unlike those considered by Darwin and his followers **Biology with Connect Access Card** Peter Raven, 2012-06-07 Committed to Excellence in the Landmark Tenth Edition This edition continues the evolution of Raven Johnson s Biology The author team is committed to continually improving the text keeping the student and learning foremost We have integrated new pedagogical features to expand the students learning process and enhance their experience in the ebook This latest edition of the text maintains the clear accessible and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology and have been enhanced in this landmark Tenth edition This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular molecular biology and genomics to offer our readers a text that is student friendly and current Our author team is committed to producing the best possible text for both student and faculty The lead author Kenneth Mason University of Iowa has taught majors biology at three different major public universities for more than fifteen years Jonathan Losos Harvard University is at the cutting edge of evolutionary biology research and Susan Singer Carleton College has been involved in science education policy issues on a national level All three authors bring varied instructional and content expertise to the tenth edition of Biology Life Stories Heather Newbold, 2000-04-22 This unusual collection of conversations with leading environmental thinkers breaks down the conventional separation between thinking and living The presentations of ecological ideas are not only superior but often eloquent and powerful and incorporate the latest information available Since many of the chapters give quite full accounts of the interviewees careers the book will also provide inspiration to young readers Ernest Callenbach author of Ecology A Pocket Guide The recurring theme of environmental

emergency comes through loud and clear in all of the interviews but this book also shows that it is people who make things happen not the great gray they or we We learn exactly who it was that discovered the hole in the ozone layer and who invented the ideas of Gaia and the Population Bomb If I had my way I would make this book required reading for students across all disciplines because its message is profound urgent compelling and relevant to everyone Anthony J F Griffiths University of British Columbia Winner of the Genetics Society of Canada Award of Excellence Life Stories should be required reading The reverence for life expressed by these heroes is deeply moving Their fierce determination ought to inspire all of us as we confront the environmental challenges of the new millennium Denis Hayes International Chair Earth Day 2000 We start the twenty first century with a heightened awareness that our planet is under stress Life Stories illustrates that the human spirit has the capacity to set forces in motion that will save our habitat Heather Newbold introduces us to scientists who have probed the mysteries of our natural systems and taken action so our Earth can heal itself As we meet them our own hope for the future is inspired Peter A A Berle host of The Environment Show on Public Radio These mini autobiographies are captivating challenging and worrisome We can successfully meet the challenge but will we This is attention grabbing stuff Once you start reading this book it will capture and hold you to the last page Senator Gaylord Nelson founder of Earth Day
