Blueprint for Survival Edward Goldsmith,1972 *A Blueprint for Survival* ,1972 **A Blueprint for Survival** Edward Goldsmith,1972 **Blueprint for Survival** Ecologist,Edward Goldsmith,1974-04-01 *A Blueprint for Survival, by the Editors of The Ecologist* ,1972 **Blueprint for Survival** William Morse,1957 *A Blueprint for Survival* Melford Pearson,2002

The main thrust of *A Blueprint for Survival* is to offer proposals for the solution of the most serious problems both economic and political that burden the nation. It recognizes the fact that comprehensive economic justice and peace can only be achieved by the restructuring of the economic and political systems themselves. The first part of the book is devoted to presenting the inherent flaws in the nation's private capitalist system. Without understanding how the economic and political systems are wrongly structured resulting in the nation's most egregious problems, millions suffering unmet needs, there cannot be a full understanding of the proposals for a National Cooperative Commonwealth that is proposed in the second part of the book. The four major flaws in our economic political systems are dealt with: Absence of any restraints on the growth of unnatural entities called corporations. Since the inception of our nation they have progressively taken over the nation's productive capability until today through accelerated mergers they are oppressively dominant in every area of the nation's products, services, and all levels government. Unconstitutional control of the nation's money and credit by private financial entities. Such control has led to the astronomical debt of trillions of dollars with the private citizens and their government in perpetual bondage to non-producers. Most seriously they have had the power to place liens against the workers' future earnings as the only means by which they could purchase what they in the accumulate had already produced. Those who control the economic and financial systems control the political processes by which government operates. First they have gotten control of the nation's issuance of money and credit, then corralled all of its industrial assets and technology, and finally through these interlocking monopolies underwritten all major candidates who will be beholden to act according to the wishes and dictates of their underwriters. Inability of the social economic financial system to constructively accommodate the advancements in science and technology. It has been a two-edged sword with strides made in many fields of human endeavor, but at the same time it has created threats to life itself. The most potent indictment against the private capitalist system is that there have existed serious unmet needs while at the same time there has been unused technological capability to fulfill those needs. The nation has reached a critical mass in the functioning of its economic, social, and political patterns. The primary purpose of the book is to enlighten the people as to the inevitable breakdown of adversary systems like private capitalism and the need to embrace cooperative teamwork systems. The secondary purpose and most defining in terms of hope and the future is to present the legal steps that can be taken within the framework of the Constitution leading to the adoption of a National Cooperative Commonwealth. Employing the principle of incorporation, a National Cooperative Commonwealth is simply incorporating the entire productive capability of the nation, its natural resources, its productive

machinery its human skill and its technology into a Grand Corporation in which every citizen is a common shareholder and a preferred shareholder giving each citizen a decision making voice and also giving each a purchasing claim against the total goods and services produced It is a Commonwealth in which the people democratically coordinate the full productive capability of the nation so that it can be unleashed for an abundant equitable and creative life for all It is a Commonwealth in which the nation s work capability would be automatically unleashed in direct ratio to the determined needs and services of the total citizenry devoid of all the stultifying burdens of indebt
