Canada. Water Resources Division, 1915 Automotive Ergonomics Heiner Bubb, Klaus Bengler, Rainer E. Grünen, Mark
Vollrath, 2021-10-19 Ergonomics teaches how to design technology in such a way that it is optimally adapted to the needs
wishes and characteristics of the user In this context the concept of the human machine system has become established In a
systematic way and with a detailed view of the complicated technical and perceptual psychological and methodological
connections this book explains the basics of automotive ergonomics with numerous examples The application is shown in
examples such as package design of displays and control elements of environmental ergonomics such as lighting sound
vibrations climate and smell The design of driver assistance systems from an ergonomic perspective is also a central topic
The book is rounded off by methods of ergonomic vehicle development the use of mock ups driving simulators and tests in
real vehicles and prototypes For the first time those responsible in the automotive industry and in the field of relevant
research are provided with a specialized systematic work that provides the ergonomic findings in the design of today s
automobiles This provides planners and designers of today s automobiles with concrete information for ergonomic product
development enabling them to keep an eye on decisive requirements and subsequent customer acceptance This book is a
