As we explain the components of Livewire you jump right into practice replicating testing and modifying the code we show in this book. The book is currently under development.

Chapter 1 We will create the project that we will carry out in the course

Chapter 2 We will create the main migrations and models that we will use in the application

Chapter 3 In this chapter we are going to create the CRUD for the blog that is the posts categories tags among others

Chapter 4 We will create the blog for the end user paginated listing with filters and details

Chapter 5 We will create the Store with payment gateways for PayPal and Stripe for the end user with paginated listings with filters and details

Chapter 6 We will create an online store for products instead of a book store to make it more generic

Chapter 7 In this section we will implement several changes to the online store app such as setting the language dark mode improving the design and adding a payment viewer

Objective The training objective is twofold

- 1 Creating an online store with basic payment options through Stripe and PayPal easily scalable for other payment methods
- 2 Explaining and putting into practice crucial concepts so you can implement the why of things and adapt the online store to your needs

concepts such as Logic for managing payments in a centralized and scalable manner using a global entity called Payment

Why create a layered system for the payment gateway for scalability and maintenance

Using a generic product type entity or a specific one

Customizing listings and details by product

These are just some of the points we cover in this training which in short is more than just application coding

Advantages of developing in Laravel Livewire and taking this training

It's great for creating applications when you need to communicate frequently between the client and the server

For this reason it's ideal for creating applications such as online stores that require a lot of interaction with the client and consequently the server

Thanks to Laravel it offers excellent organization it's a fast powerful framework with ready to use libraries and helpers and it's extensible with third party and framework specific packages and libraries

It's ideal for creating real world maintainable and scalable applications

You will learn to develop a modular and scalable application which will allow you to improve your software development skills
