

An extensive test programme led to the development and certification of an optional kit for the T77, including deflation valves on the main and towed wheel legs, an alternate restraint harness on the seatbelts of the aircraft, protection on the towed legs and for the hydraulic brake line and the speed brake control system, strengthening of the V101, D800 and ATC seats on the underside of the fuselage and various alterations ('blow away pins' through the engine brackets, the deflation on the forward-retracting nose wheel is of such nature that it cannot be broken in the normal wheel and axle).
