Ultra Low Noise CMOS Image Sensors Assim Boukhayma,2017-11-28 This thesis provides a thorough noise analysis for conventional CIS readout chains while also presenting and discussing a variety of noise reduction techniques that allow the read noise in standard processes to be optimized Two physical implementations featuring sub 0.5 electron RMS are subsequently presented to verify the proposed noise reduction techniques and provide a full characterization of a VGA imager Based on the verified noise calculation the impact of the technology downscaling on the input referred noise is also studied Further the thesis covers THz CMOS image sensors and presents an original design that achieves ultra low noise performance Last but not least it provides a comprehensive review of CMOS image sensors
