Discourse, Grammar and Ideology Christopher

Hart, 2014-10-23 Researchers in critical discourse analysis CDA have often pointed to grammar as a locus of ideology in discourse. This book illustrates the role that grammars as models of language and image can play in revealing ideological properties of texts and discourse in social and political contexts. The book takes the reader through three distinct grammatical frameworks: functional grammar, multimodal grammar, and cognitive grammar. Using examples taken from a range of discourses relating to globalisation, including discourses of immigration, war, corporate practice, and political protests, the book demonstrates the individual utility and the interconnectedness of these models inside CDA. A key argument advanced is that the cognitive processes necessarily involved in making sense of language are based in visual experience. This position offers new ways of understanding the ideological effects of grammatical choices in texts and suggests a reassessment of the relationship between linguistic and multimodal grammars in CDA. The book will appeal to students and researchers interested in CDA and the relationship between discourse, cognition, and social action. Exploring Discourse Strategies in Social and Cognitive Interaction Manuela Romano, Maria Dolores Porto, 2016-03-31 This volume offers readers interested in Discourse Analysis and/or Socio-Cognitive models of language a closer view of the relationship between discourse, cognition, and society by disclosing how the cognitive mechanisms of discourse processing depend on shared knowledge and situated cognition. An inter- and multidisciplinary approach is proposed that combines theories and methodologies coming from Conceptual Metaphor Theory, Multimodal Metaphor Theory, Critical Discourse Analysis, Narratology, Systemic Functional Linguistics, Appraisal Theory, together with the most recent developments of Socio-Cognitive Linguistics for the analysis of real communicative events which range from TV reality shows, commercials, digital stories, or political debates to technical texts, architectural memorials, newspapers, and autobiographical narratives. Still, several key notions are recurrent in all contributions: embodiment, multimodality, conceptual integration, metaphor, and creativity as the fundamental constituents of discourse processing. It is only through this wide-ranging epistemological and empirical approach that the complexity of discourse strategies in real contexts, i.e. human communication, can be fully comprehended and that discourse analysis and cognitive linguistics can be brought closer together. *Cognitive Linguistics - A Survey of Linguistic Subfields* Ewa Dąbrowska, Dagmar Divjak, 2019-07-08 The chapters provide comprehensive surveys of the major subfields of Cognitive Linguistics.
