Uberland Alex Rosenblat, 2018-10-23 Silicon Valley technology is transforming the way we work, and Uber is leading the charge. An American startup that promised to deliver entrepreneurship for the masses through its technology, Uber instead built a new template for employment using algorithms and Internet platforms. Upending our understanding of work in the digital age, *Uberland* paints a future where any of us might be managed by a faceless boss. The neutral language of technology masks the powerful influence algorithms have across the New Economy. *Uberland* chronicles the stories of drivers in more than twenty-five cities in the United States and Canada over four years, shedding light on their working conditions and providing a window into how they feel behind the wheel. The book also explores Uber's outsized influence around the world: the billion-dollar company is now influencing everything from debates about sexual harassment and transportation regulations to racial equality campaigns and labor rights initiatives. Based on award-winning technology ethnographer Alex Rosenblat's firsthand experience of riding over 5,000 miles with Uber drivers, daily visits to online forums, and face-to-face discussions with senior Uber employees, *Uberland* goes beyond the headlines to reveal the complicated politics of popular technologies that are manipulating both workers and consumers. *Designing the Digital Experience* David Lee King, 2008 Written for creative, tech-savvy, and business-minded individuals who want to increase the accessibility of their websites, this sensible guidebook explains the concepts behind designing experiences on the internet. From helping customers quickly find information and make their purchases to clearly communicating needs and interests, this resource will not only develop consumer loyalty but will encourage them to spread the word about the sites they frequent. Focusing on the three key areas

of structure community and customers designers will enable clients to focus on their own goals rather than on difficulties in navigating Also included are tips on how to generate conversations with blogs wikis and podcasting to create a personal touch
