- 1 a Many of the fixed costs for a 200 tonne day⁻¹ plant are less than double those of a 100 tonne day⁻¹ plant: for example, the larger plant will require less than twice the area of land for building, and the cost of building access roads will be less than twice as great.
- b You have to pay the same fixed costs such as wages and land rental regardless of how much you are producing. But variable costs such as costs of raw materials and energy will double if you double output.
- 2 a Thermal energy released from the reaction can be used to pre-heat, via a heat exchanger, the water which will be made into steam as one of the reactants.
