and frameworks This book will guide you through the WebDriver APIs that are used in automation tests Chapter by chapter we will construct the building blocks of a page object model framework as you learn about the required Java and Selenium methods and terminology The book starts with an introduction to the same origin policy cross site scripting dangers and the Document Object Model DOM Moving ahead we ll learn about XPath which allows us to select items on a page and how to design a customized XPath After that we will be creating singleton patterns and drivers Then you will learn about synchronization and handling pop up windows You will see how to create a factory for browsers and understand command design patterns applicable to this area At the end of the book we tie all this together by creating a framework and implementing multi browser testing with Selenium Grid What you will learnUnderstand what an XPath is and how to design a customized XPathLearn how to create a Maven project and buildCreate a Singleton driverGet to grips with Jenkins integrationCreate a factory for browsersImplement multi browser testing with Selenium GridCreate a sample pop up window and JavaScript alertReport using Extent ReportsWho this book is for This book is for software testers or developers

Science of Selenium Kalilur Rahman,2019-12-10 Step by step guide to understand key concepts for Selenium Automation using examples to shine in your interview for test automation roles DESCRIPTION Software Engineering has taken massive strides with a multitude of technology innovations With several changes being introduced development of products and their integration into the market understanding of mobile devices and user interface channels across a plethora of platforms is getting complex day by day In addition since the process or procedures of software testing for products and applications can become an act of boiling the ocean the role of test automation is crucial while dealing with such challenges This book aims to equip you with just enough knowledge of Selenium in conjunction with concepts you need to master to succeed in the role of Selenium Automation Engineer It is the most widely used test automation tool and a much sought after automated testing suite by automation engineers who are equipped with technical expertise and analytical skills for web applications across different browsers and platforms The book starts with a brief introduction to the world of automation and why it is important succinctly covering the history of Selenium and the capabilities it offers In this book you will learn how to do simple Selenium based automation with examples and understand the progressive complexity of some key features Before diving deep into advanced concepts such as Page Object Models Test Automation Framework and Cross Browser testing you will grasp comprehensive knowledge of several concepts related to Java Python JavaScript and Ruby programming languages In addition concepts on Selenium Web Driver Grid and use of Selenium Locators IDEs and tools to build complex test automation framework are also explained with practical examples Each chapter has a set of key concepts and questions that one may face during interviews KEY FEATURES Acquire Selenium skills to do independent test automation projects Learn the basics of Selenium Web Driver for test automation using Selenium Understand Page Object Model including how and when they re used in test automation Understand the approach for building a test automation framework Build Selenium test

automation scripts using various languages Java Python JavaScript Node JS and Ruby Learn how to report and integrate with CI tools for test automation Get some professional tips for handing interviews and test automation approach Implement cross browser testing scenarios using Selenium Grid and commercial tools and services WHAT WILL YOU LEARN By the end of the book you will find several examples to help ignite your understanding and usage of Selenium across a myriad of languages and frameworks With this you ll be able to put your knowledge to practice and solve real life test automation challenges such as testing a web site mobile application and leveraging tools available for fast tracking your test automation approach You can also choose to practice additional examples provided in the code bundle of the book to master the concepts and techniques explained in this book WHO THIS BOOK IS FOR The book is intended for anyone looking to make a career in test automation using Selenium all aspiring manual testers who want to learn the most powerful test automation framework Selenium and associated programming languages or working professionals who want to switch their career to testing While no prior knowledge of Selenium test automation or related technologies is assumed it will be helpful to have some programming experience to understand the concepts explained in this book Table of Contents 1 Introduction to Test Automation 2 Introduction to Selenium 3 Understanding Selenium Architecture 4 Understanding Selenium Tools 5 Understanding Web UI 6 Web UI Automation with Selenium Using Java Python 7 Selenium Coding with Other Languages Ruby JavaScript 8 Building a Test Automation Framework with Selenium 9 Advanced Features of Selenium Using Java Python 10 Cross Browser Test Automation 11 Tips and Tricks for Test Automation 12 Interview Tips   Selenium Framework Design in Keyword-Driven Testing Pinakin Ashok Chaubal,2020-04-13 An easy to understand guide that will get you acquainted with the core concepts of Selenium WebDriver KEY FEATURES Learn how to build a Keyword Driven Automation Framework with Selenium using Java Understand and work with the core concepts of Selenium WebDriver 3 0 Find how to use Build triggers in Jenkins to automate tests DESCRIPTION The book starts by introducing the Selenium WebDriver 3 and Selenium Server by covering each aspect of it in detail You will learn different concepts like instances and how instances relate to browser sessions You will further explore the new features in Java 8 with the help of easy to follow examples Moving on you will create a Singleton class for fetching WebDriver instances and then explore the different kinds of waits in Selenium You will then delve into the advanced WebDriver interactions using the Actions class and the JavascriptExecutor You will then understand the various database operations which will help you with using the MySQL database to store our framework Next you will go through the TestNG framework followed by parallel execution Further you will use Maven as a build tool and Jenkins as a build automation tool You will go through the working of Selenium Grid along with Mobile automation Lastly you will be taken through Selenium 4 and it s AI integrated features WHAT WILL YOU LEARN Learn the process of building a Selenium Framework Understand the Keyword Driven Framework concept Work with Document Object Model to access page elements Integrate Maven and Jenkins with Selenium WebDriver Use Selenium Grid to run multiple tests across WHO THIS

BOOK IS FOR This book has been designed for Automation developers who would like to build a Keyword Driven framework that fetches keywords from Database It is also intended for audiences who are interested in understanding Selenium and designing a framework TABLE OF CONTENTS 1 First look at Selenium WebDriver and Web Elements 2 Looking at the various WebDrivers 3 A brief look at Java 8 4 Deep dive into Selenium WebDriver 5 Actions class and the JavascriptExecutor 6 WebDriver Events 7 Database Operations 8 Introduction to TestNG framework 9 Parallel Execution 10 Understanding Maven 11 Jenkins Introduction and Scheduling 12 Selenium grid and executing in the cloud 13 Mobile test automation using Appium 14 A look at Selenium 4 Selenium with Java – A Beginner's Guide Pallavi Sharma,2022-02-15 A refresher for Java developers on how to use Selenium IDE and Selenium Grid to automate web browsers KEY FEATURES Extensive practical demonstration of Selenium with numerous real world examples Includes thorough examination of various test automation ideas Covers tools in conjunction with Selenium for implementing browser and web test automation projects DESCRIPTION This book introduces setting up the environment for writing test scripts after covering Selenium and its capabilities Numerous functionalities including the web driver interface the web element interface and locators are illustrated in depth using the By class Additionally the book presents tasks such as HTML element manipulation mouse and keyboard operations dropdown table window alert frame action class and synchronization Along with Selenium IDE and Selenium Webdriver the book also covers another critical feature which is the implementation of Selenium Grid that allows the test suite to execute in parallel across several settings Several add on automation scripts such as those for taking screenshots object and data information are thoroughly displayed and explained in this book The book discusses tools like TestNG and Maven that aid in the overall development of the test project ecosystem After reading the book you should feel extremely competent in utilizing Selenium to automate a variety of web and browser testing scenarios and tasks WHAT YOU WILL LEARN Get trained to automate the end to end testing of online applications with Selenium Webdriver Confidently configure the Selenium Grid for cross browser testing Create locators quickly for various HTML elements on the page Opportunities to improve test writing skills with the popular unit test framework TestNG An in depth explanation of the management of objects and data in the test project WHO THIS BOOK IS FOR This book is intended for software test engineers who wish to develop a strong foundation in Selenium implementation to create test automation solutions Basic knowledge of testing and Java as a programming language is required AUTHOR BIO Pallavi is a multi skilled professional and has donned many hats in her career span She founded 5 Elements Learning where she acted as a coach writer and speaker on test automation solutions and collaborated with learning enthusiasts organizations and mentors from across the globe She is a Steering Committee member at Agile Testing Alliance ATA She has contributed to Selenium Documentation at the Selenium Project She is the author of the book Selenium with Python Beginners with BPB Publications She has curated organized and acted as a jury for various international conferences and meetups like Selenium Conference India StepIn Delhi Selenium Conference by ATA APISummit
