,1907 Streaming and Copyright Law Lasantha Ariyaratna,2022-09-05 This book examines the challenges posed to
Australian copyright law by streaming from the end user perspective It compares the Australian position with the European
Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically
examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues
for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital
content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet
Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law
because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas
between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is
uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of
embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end
users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the
defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When
considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to
access a website that contains infringing digital content even if they lack any knowledge about the content s infringing
nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through
streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe
lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming
websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital
content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users
access to digital content This is because the principles of proportionality and public interest have been given less attention
