Essentials of Marketing Analytics, 1e Joseph F. Hair (Jr.), Dana E. Harrison, Haya Ajjan, 2021 We developed this new book with enthusiasm and great optimism Marketing analytics is an exciting field to study and there are numerous emerging opportunities for students at the undergraduate level and particularly at the master s level We live in a global highly competitive rapidly changing world that is increasingly influenced by digital data expanded analytical capabilities information technology social media artificial intelligence and many other recent developments We believe this book will become the premier source for new and essential knowledge in data analytics particularly for situations related to marketing decision making that can benefit from marketing analytics which is likely 80 percent of all challenges faced by organizations

The Standard, 1906 **The Hindustanee Student**, 1917 *Natural Language Processing in Action, Second Edition* Hobson Lane, Maria Dyshel, 2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised edition you ll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more You ll create NLP tools that can detect fake news filter spam deliver exceptional search results and even build truthfulness and reasoning into Large Language Models LLMs In Natural Language Processing in Action Second Edition you will learn how to Process analyze understand and generate natural language text Build production quality NLP pipelines with spaCy Build neural networks for NLP using Pytorch BERT and GPT transformers for English composition writing code and even organizing your thoughts Create chatbots and other conversational AI agents In this new and revised edition you ll discover state of the art NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more Plus you ll discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results About the technology From nearly human chatbots to ultra personalized business reports to AI generated email news stories and novels natural language processing NLP has never been more powerful Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications This book is your entrance ticket and backstage pass into the next generation of natural language processing About the book Natural Language Processing in Action Second

Edition introduces the foundational technologies and state of the art tools you'll need to write and publish NLP applications. You learn how to create custom models for search translation writing assistants and more without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, Hugging Face transformers, fine tuning large language models and more. What's inside NLP pipelines with spaCy, Neural networks with PyTorch, BERT and GPT transformers, Conversational design for chatbots. About the reader: For intermediate Python programmers familiar with deep learning basics. About the author: Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines. Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI. Cole Howard and Hannes Max Hapke were co authors of the first edition.

Mark Lane Express, 1925 **The Medical World**, 1922 Florists Exchange and Horticultural Trade World, 1928

Code Red Wynton Hall, 2026-03-17 You don't get to opt out of the AI revolution. That decision has already been made for you. Breitbart social media director Wynton Hall asks what other decisions have been made. Today 99% of Americans use AI even if most of us don't realize it. Big Tech is quietly hard coding left wing ideology into the algorithms that now govern daily life. The Left is already weaponizing AI while conservatives sleepwalk straight into calamity unless they're ready for what's coming. In **Code Red** Breitbart social media director Wynton Hall exposes where that power hides, how it operates, how conservatives can navigate the AI political battlescape, avert its landmines, and turn peril into promise. AI decides what you see and what gets censored. It's quietly rewiring our whole way of life: Jobs, Schools, Family, Church, Even national security. All of it will shock, test our civic order. Inside **Code Red** you will discover: Why AI is wired for woke indoctrination and how to resist it. How elites plan to weaponize AI job losses to push dependency. How America can beat China without becoming China. How to prepare your kids for the blinding speed of AI disruption. The new national security threats AI unleashes and how we defend against them. Why AI girlfriends are luring millions and what it will take to preserve authentic human connection. How AI will test faith and meaning and why spiritual renewal may be its most surprising outcome. Urgent, deeply researched and written with page-turner elegance, **Code Red** is the conservative battle plan for the AI era. Either we wake up and fight back or we lose everything that made America free. The Publishers' Circular and Booksellers' Record, 1926 *Project Maven* Katrina Manson, 2026-03-24 The dramatic story of the secretive decade-long Pentagon campaign to deliver America into the age of AI warfare. In 2017 a small crew gathered in a windowless Pentagon room to put AI at the heart of how America makes war. Led by Drew Cukor, an unyielding Marine Corps colonel driven by the deaths of US troops and the prospect of war with an AI equipped China, the Project Maven team raced to send AI into combat, igniting controversy and forever changing the US military. Summoning the mayhem of a tech startup, the Maven team wrestled Pentagon bureaucrats and each other. They enlisted an initially reluctant Silicon Valley supercharged the growth of Palantir and sent algorithms made by Amazon, Microsoft and others into hot wars. Maven fielded technology to identify targets at speed and scale, developed AI-infused

command systems and learned where AI fails The prospect of machines making independent decisions about life and death alarmed members of the military across all ranks and the project sparked a revolt among thousands of tech workers at Google Yet today Maven s AI enabled systems operate in every branch of the US military and its lessons are folded into developing autonomous technology set to be on the front lines of future war Project Maven and its legacy sit at the intersection of colliding trends America s insecurity about declining global power the technological revolution driving AI into every aspect of society the dominance of Big Tech all encompassing surveillance and the ambitions of China s growing military As the second Trump administration pours money into military AI and autonomy while the UN Secretary General clamors for a ban on killer robots this book investigates whether AI will improve accuracy and save lives or if a fundamentally unreliable black box technology will unleash mistakes and atrocities at scale Drawing on more than 200 interviews with insiders and opponents this compelling narrative tells the definitive story of how AI warfare once the stuff of apocalyptic science fiction has become a reality
