Designing Assistant Technology Christopher Noessel, 2026-03-17 When artificial intelligence is designed poorly it diminishes people's skills rather than enhancing them. It can even make users less capable and more dependent on AI. In *Designing Assistant Technology* Christopher Noessel provides a framework for how to use AI to assist users as well as mitigating the risks of de-skilling and overreliance on AI. Who Should Read This Book This book was written with four audiences in mind: Product owners and technology strategists who want to ensure that the software they offer is doing everything it can for users and their organizations; Interaction designers, user experience professionals, educators, and students who will build and inform the direct experiences with these systems; Futurists and tech sector pundits who might want to understand that AI is only as dark as they let it become; Everyone else because part of the responsibility of being a citizen is building literacy in the major forces at play, what biases those forces have, and what needs to be done to combat negative effects. Takeaways You'll learn to understand the conceptual difference between an agent and an assistant; Better understand your business's challenges and how AI can help; Incorporate the book's framework into an existing design process; De-risk how assistants are introduced to a workflow; Learn design patterns to mitigate the risks of assistants; Rely on AI assistants just enough but not too much.

How Equality Wins Kenji Yoshino, David Glasgow, 2026-02-17 The renowned legal experts behind *Say the Right Thing* return with this clarion call for reimagining the work of diversity, equity, and inclusion. DEI in a divided nation: Equality in America is under siege. Corporations and universities are abandoning the DEI programs they previously championed. The tools Americans had for advancing fairness are facing a relentless political and legal assault. So how do we build a more just nation when the old playbook is no longer viable? In this groundbreaking manifesto, Kenji Yoshino and David Glasgow, founders of the Meltzer Center for Diversity, Inclusion, and Belonging at NYU School of Law, candidly unpack where DEI went wrong and offer a roadmap to rebuild equality for the new era. Drawing on their peerless legal expertise and extensive experience advising leaders in corporate America, academia, and the non-profit sector, Yoshino and Glasgow share tangible strategies to put this nation back on a more inclusive path, such as by fostering free speech and dissent, reclaiming the concept of merit, and welcoming groups that felt neglected by DEI. In doing so, they provide an urgently needed blueprint to ensure the work of equality can overcome the backlash and emerge stronger on the other side. In an era when equality is imperiled, *How Equality Wins* provides a bracing critique and hopeful call to action for anyone committed to creating a fairer society.
