

# Self-Review

## Goals for this period

The following are the goals that were agreed for the period:

- Ship project Thanos successfully: hitting the deadline, and keeping quality high.
- Keep the code quality high on the team.
- Take on at least one one public speaking engagement.
- Be involved in at least one [RFC discussion](#) outside the team.
- Mentor Alex on the team.

## My accomplishments

I have hit all major goals set, but one:

- Shipped project Thanos ahead of schedule. Thanos is expected to generate \$1M in annual revenue. A few notable pull requests I made include [T34215](#), [T33553](#) and [T42008](#).
- Improved our coding quality: both by formalizing coding guidelines, partially automating them through linting and by pairing with people more often.
- I've reviewed and discussed 3 RFCs outside the team ([Geo.RFC](#), [Payback.RFC](#) and [Moovala.RFC](#)).
- Mentored Alex throughout the period, and I'm seeing good growth from him.
- I did not do a public talk, deciding to focus on Thanos instead, given it's business impact. However, I have helped Alex prepare for the university presentation.

### Additional achievements:

- Jumped in and shipped the Payback project, working with 3 other engineers on another team. Payback is a strategic project, and the #1 priority for the Payback team for this period.
  - Sent weekly update emails on to Payback stakeholders, jumping in for a few weeks, while the project lead was unexpectedly out ([an example email](#)).
- Drove the postmortem and improvements after the cache system outage. These changes should help us detect similar incidents in 5 minutes over 2 hours, resulting in impact reduction of up to \$25,000 per incident (the business impact of this incident was \$22,000 in losses).
- Onboarded Sam to the team.
- Proposed architecture improvements to the Gamma system: this work is in our backlog for the next period. This work should accelerate the retirement of 50% of the current Gamma infrastructure.
- Pushed 130 pull requests and did 180 code reviews in this period.
- Did 10 interviews (10 phone screens, 8 architecture ones).

See a list of all my accomplishments [in my work log document](#).

## How I worked with others

I try to put the team and others ahead of myself. This is how I feel I can help the team the most. A few highlights in this area:

- I kept the coding quality high, through thorough code reviews. Examples of high-quality code reviews include:
  - [T3443](#): pointing out tests that don't do what they are expected to do
  - [T34382](#): pushing back on an inbound, low-quality code change coming in from another team
  - [T3880](#): giving feedback to Sam on our coding style (note: I later followed up in-person)
- Alex has been giving me very positive feedback and said that my support means a lot to him in growing. I try to prepare with ideas and suggestions to our catch-ups, and pair with him on code reviews, when I have the time.
- I spent considerable time onboarding Sam. He had issues with his setup and his first few commits. I paired with him more frequently than I planned to. This seems to have paid off, as he's now just as productive as any team member.
- I'm a frequent point of contact for team stakeholders. Our data scientist (John) and engineers from the Payback and Chat team (Deno, Emily and Tom) frequently directly ping me for questions and we have a good relationship.
- Though I did no public speaking myself, I mentored Alex to prepare for the university talk - that went very well.
- I received numerous thank you messages from within, and outside the team:
  - Emily from the Chat team: "Thank you, for helping us out with the last minute debugging and deployment. You making yourself available made it possible to hit our deadline, despite the last-minute issues."
  - John: "I want to send a quick thanks for how much you're helping me with analytics queries. Keep it up!"

## Levels and competencies assessment

Here are my thoughts on the expectations and competencies for the past period.

- **Overall:** I feel I've made strong progress towards exceeding what is expected of my level. I'm curious to hear observations and feedback on where I am.
- **Software engineering:** I focused a lot on this area.
- **Collaboration:** I worked a lot with people from other teams: data science (John), Payback (Deno) and Chat (Emily and Tom). I've also been involved with architecture discussions with 3 other teams.
- **Design and architecture:** I really focused on this area for the period, expanding my involvement from beyond the team. The multiple, significant RFC contributions are a good example of this.
- **Results and impact:** I've been prioritizing business results, and the impact shows. All key projects were shipped on time or before. I achieved this by putting other priorities later, such as some of my citizenship commitments, or delaying my public speaking engagement.
- **Citizenship:** I spent a lot of time mentoring and onboarding others. I did not put additional focus on this area, external to the company, though.

**Knowledge-based Software Engineering** Tatjana Welzer, Shuichiro Yamamoto, Ivan Rozman, 2002. Annotation: The book captures the latest developments in the areas of knowledge engineering and software engineering. Particular emphasis is placed upon applying knowledge based methods to software engineering problems. The Conference from which the papers are coming originated in order to provide a forum in which the latest developments in the field of knowledge based software engineering could be discussed. Although initially targeting scientists from Japan, the CIS countries and countries in Central and Eastern Europe, the authors come from many countries throughout the world. JCKBSE 2002 continues with this tradition and is anticipating even wider international participation. Furthermore, the scope of the conference as indicated by its topics has been updated to reflect the recent development in all the three covered areas, i.e. knowledge engineering, software engineering and knowledge based software engineering.

**C++ how to Program** Harvey M. Deitel, Paul J. Deitel, 2005. With over 250,000 sold, Harvey and Paul Deitel's C How to Program is the world's best selling introduction to C programming. Now this classic has been thoroughly updated. The Deitels' groundbreaking How to Program series offers unparalleled breadth and depth of programming concepts and intermediate level topics for further study. The books in this series feature hundreds of complete working programs with thousands of lines of code. Deitel's C How to Program is the most comprehensive practical introduction to C ever published, with hundreds of hands-on exercises, roughly 250 complete programs written and documented for easy learning and exceptional insight into good programming practices, maximizing performance, avoiding errors, debugging and testing. The updated Fifth Edition now includes a new early classes pedagogy, classes and objects are introduced in Chapter 3 and used throughout the book as appropriate. The new edition uses string and vector classes to make earlier examples more object oriented. Large chapters are broken down into smaller, more manageable pieces. A new OOD UML ATM case study replaces the elevator case study of previous editions, and UML in the OOD UML case study and elsewhere in the book has been upgraded to UML 2. The Fifth Edition features new mini case studies, e.g. GradeBook and Time classes. An employee hierarchy replaces Point Circle Cylinder to introduce inheritance and polymorphism. Additional enhancements include tuned treatment of exception handling, new Using the Debugger material and a new Before You Begin section to help readers get set up properly. Also included are separate chapters on recursion and searching/sorting. The Fifth Edition retains every key concept and technique ANSI C developers need to master: control statements, functions, arrays, pointers, and strings, classes and data abstraction, operator overloading, inheritance, virtual functions, polymorphism, I/O templates, exception handling, file processing, data structures, and more. It also includes a detailed introduction to Standard Template Library (STL) containers.

### **Self Evaluation Sample For Software Engineer Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Self Evaluation Sample For Software Engineer has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Self Evaluation Sample For Software Engineer has opened up a world of possibilities. Downloading Self Evaluation Sample For Software Engineer provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Self Evaluation Sample For Software Engineer has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Self Evaluation Sample For Software Engineer. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Self Evaluation Sample For Software Engineer. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Self Evaluation Sample For Software Engineer, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of

the websites they are downloading from. In conclusion, the ability to download Self Evaluation Sample For Software Engineer has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

### FAQs About Self Evaluation Sample For Software Engineer Books
