Education in Haiti Mercer Cook, 1948 The Student, 1884 *Make Science Fun: Experiments* Jacob Strickling, 2017-11-06

Make Science Fun 2 is intended for an older, more serious age group of 8-15 and is designed for children to do actual science experiments, not just science activities at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities which are fun to do, help learn science, but a fun science activity isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment, you need to take measurements, make observations, and control variables. With space to write hypotheses, record results, make observations, and draw graphs required, *Make Science Experiments* is a strong foundation on which to build student awareness of the importance of science in everyday lives.

SELLING POINTS Science experiments for the kitchen, garage, or workshop, bathroom, and garden. Bonus projects perfect for a science fair or school project. Projects using only basic products that can be found in every home kitchen or bathroom. *Make Science Fun* banishes the science is boring stereotype through fun experiments that children can do alone or with friends or parents.
