University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system. It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan. The author develops a four-dimensional framework for the analysis of the ranking phenomenon in the island state. First, the technological-ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities. Next, the technological-geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education. The two conceptual dimensions focus on the relationship between the rankings and power in higher education. They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives. From an ecological perspective, the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan. The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy. Geographically, while the empirical analysis is based on data from Taiwan, the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia.

The Dream Is Over

Simon Marginson, 2016-09-08 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. The Dream Is Over tells the extraordinary story of the 1960 Master Plan for Higher Education in California, created by visionary University of California President Clark Kerr and his contemporaries. The Master Plan's equality of opportunity policy brought college within reach of millions of American families for the first time and fashioned the world's leading system of public research universities. The California idea became the leading model for higher education across the world and has had great influence in the rapid growth of universities in China and East Asia. Yet remarkably, the political conditions supporting the California idea in California itself have evaporated. Universal access is faltering, public tuition is rising, the great research universities face new challenges, and educational participation in California once the

inhumane or insipid experience with the various sources of global ranking into the kind of humanly and cultural experience
within our daily lifestyle Their outlook from presentation is masked with the number purely and perhaps through a myriad of
complicated data or ranking information The concept or self identification within the experience or exposure would be less
substantial or hard to get palpable My attempt to improve this aspect of contemporary practice certainly will fall short but
you can sense in some paragraphs or titles I wrote this small piece of book in the end to take care of human integrity and
stories for advancing the inherence and liveliness of interested actors or consumers despite all the wind heads from the turf
