**Reading Randomised Controlled Trials** Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03  
In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children s literacy but a case study in which the methodology of single randomised controlled trials in education can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education

### **The Use of Children's Literature in Teaching**

Alyson Simpson, 2016-03-22 The Use of Children s Literature in Teaching reveals the impact of politics professional guidelines and restrictive measurements of literacy on the emerging identities of young teachers It places renewed emphasis on the importance of creative teaching with children s literature for the empowerment of teacher agency to enhance the learning of their students Framing the debate alongside the issue of teacher autonomy Simpson describes results from a two year study which brings together information from interviews surveys document analysis and digital stories from Australia Canada the UK and the US to assess the role of children s literature in pre service teacher education Through cross cultural comparison this research captures the different levels of connection between politics education systems higher education and pre service teachers It exposes how politics narrow views of professionalism and program structures in teacher education may adversely affect the development of pre service teachers This book presents a strong case that reading and responding critically to literary texts leads to better educational outcomes than basic decoding and low level comprehension training As such this book will be of great interest to researchers and scholars working in the areas of teacher education and literacy and primary education It should also be essential reading for teacher educators and policymakers
