**Sustainable Energy in Central Asia** Nigora Djalilova, 2021-02-28 This book argues that sustainable energy development represents a new frontier for many transitional economies including those countries that are well endowed with traditional energy resources as exemplified by the case of Uzbekistan in Central Asia The book highlights the challenges and issues faced by the energy sector in countries which are undergoing a transition from government led economic models to open market economies Using Uzbekistan as a case study the book demonstrates these

challenges as well as opportunities of being part of an increasingly interconnected global market to show how governments can ensure inclusive economic growth and build pathways toward sustainable development by deploying renewable energy sources RES By applying the Quadruple Bottom Line strategy as a conceptual framework to evaluate social economic and environmental benefits and governance as a key dynamic component the book includes recommendations for implementing a transition strategy to renewable energy consumption for developing countries and offers insights into ways of dealing with government policy in post Soviet countries Presenting a holistic approach to promoting RES deployment in Uzbekistan and elsewhere this book will be of interest to researchers interested in energy transition in developing countries development economics Central Asian politics and the management of natural resources and climate change issues [Routledge Handbook on the Green New Deal](#) Kyla Tienhaara, Joanna Robinson, 2022-08-26 In recent years the Green New Deal has moved from relative obscurity to front and centre of policy discussions and public debates about how to respond to the climate crisis It has been credited with radically changing the nature of the conversation on climate change and with reenergizing the environmental movement at a critical time All Green New Deal proposals share an emphasis on the need for governments rather than markets to lead the energy transition However they differ in other respects This Handbook analyses the fundamentals underlying all Green New Deals as well as exploring national and regional variations It is divided into three parts The first part examines the political economy of the Green New Deal focussing not just on how proposals will be costed but also on opportunities for a fundamental transformation of both national economies and the global economic system The second part explores issues of justice which are central to many Green New Deal proposals including Indigenous rights racial and gender equity and justice for the Global South In the third part authors detail case studies of Green New Deal proposals and plans at the local national and regional level This book will be an invaluable research and reference volume for students and scholars in economics politics sociology geography and environmental studies It should also be of interest to those actively involved in climate and environmental policymaking [Perspectives on the Transition Toward Green and Climate Neutral Economies in Asia](#) Ordóñez de Pablos, Patricia, Almunawar, Mohammad Nabil, Anshari, Muhammad, 2023-07-24 Knowledge management and advanced information technologies such as AI IoT machine learning and more can create digital tools and solutions to build more resilient climate neutral and green economies and societies These digital tools and solutions and knowledge management can have a heavy impact on the achievement of sustainable development goals SDGs in Asia [Perspectives on the Transition Toward Green and Climate Neutral Economies in Asia](#) offers innovative conceptual frameworks and theories case studies and empirical studies to understand how knowledge management and digital innovation can foster the transition towards more circular and climate neutral economies as well as greener economies in Asia This book discusses how key and enabling digital tools and solutions and knowledge management can support the achievement of SDGs by 2030 Covering topics such as climate neutral economies image recognition and usability evaluation
