**User-centered design of wearable computers with construction kits for children** Laura Grönewald,2022-01-18 Seminar paper from the year 2021 in the subject Engineering Computer Engineering grade 1 0 University of Siegen language English abstract Addressing children s needs and interests is crucial when designing and developing computational devices for this user group Different approaches to include children in the design process such as Participatory Design have been investigated and applied in past research A way to engage children as active design partners is to let them build and reconfigure their own devices Construction kits as they have been developed by researchers in the past enable children to do so Several application scenarios for why children would build their own handhelds and wearable computers with different construction kits have been identified in past research The hardware and software components that were included in developed kits as well as the way they were used and evaluated varied widely This paper outlines the evolution of the investigation and application of construction kits in the research field of wearable computers for children By referring to approaches and findings presented in related work this paper aims to highlight the potential of using these insights as a basis for future investigations and user centered design processes Despite the technological advances it is argued that design and development processes for wearable computers for children can benefit from past research

Rural STEMM Education Research: Bridging between Uniqueness and Universality Guan Saw,Angela Starrett,Audrey Meador ,Hobart Harmon,2026-01-23 The opposition between uniqueness and universality in rural science technology engineering mathematics and medicine STEMM education research is an enduring feature of the field Theories and methods developed to be universally applicable are constantly adopted or reimaged in studying and understanding certain unique STEMM education phenomena or issues within and across rural contexts partly due to the vastness and variety that exists in what is labeled as rural and or STEMM education Research ideas and findings focused on a unique rural population or setting often can have universal implications for other rural and non rural populations or settings though not explicitly articulated in many publications Striving to be both unique and universal is a fundamental challenge yet has the potential to advance knowledge and practice in the field of rural STEMM education The overall goal of this Research Topic is to introduce and explore the ideas of rural focused and rural reimaged approaches in potentially bridging the gaps between uniqueness and universality in STEMM education research Rural

focused theories and constructs e.g. place based education rural identity are centered around populations and issues in rural settings whereas rural reimaged theories and constructs e.g. urban rural spatial inequality social capital expectancy value beliefs are traditional theories and constructs that are reconceptualized to include rural perspectives in the studies This Research Topic seeks articles that examine both the uniqueness and universality of rural STEM education and educational research utilizing rural focused and or rural reimaged lens or approaches We particularly welcome articles that address unique assets challenges needs opportunities and or lessons learned of rural STEM education while being situated in a broader research discipline as well as articles that explore the commonalities and connections across study cases policies programs practices or contexts of rural STEM education This Research Topic invites theoretical methodological and empirical contributions addressing but not limiting to the following key topics Rural focused topics Defining rurality in STEM education Defining STEM in rural areas Place based STEM teaching learning etc Rural STEM identity belonging etc STEM education in rural serving postsecondary institutions STEM education for local workforce development Rural reimaged topics Urban rural spatial inequality in rural STEM education Community cultural wealth in rural STEM education STEM funds of knowledge of rural learners Underrepresentation of rural students in STEM education Intersectionality in rural STEM education Critical policy analysis in rural STEM education Communities of practice in rural STEM education Research practice partnerships for rural STEM education Articles need to define rurality for interpretation by international readers and describe the uniqueness and universality of the research topics theories methods findings and or implications in the context of rural STEM education
