Hands On Guide: Urban Planning & Housing Prakash Apte, 2013-12-26 This book is intended to serve as a guide to public spirited men and women students and professionals who may want to participate effectively in the planning of their cities, environs and habitat. The book provides guidelines for the planning of regions, cities, projects for habitat and project evaluation of planning proposals. It provides food for thought to the state legislators, guidelines to the policy makers and lessons to the enforcement agencies in resolving issues with equity. It hopes to demonstrate to the reader through examples how these issues have been handled by the author during his 52 years of experience in regional and city planning and urban development. The author's considerable experience as consultant with organizations like the World Bank, HUDCO, City Industrial Development Corporation of Maharashtra, Mumbai Metropolitan Region Development Authority and many government and non government committees dealing with urban issues is reflected in the content of this book.

World Cities Report 2024 UN-HABITAT, 2024-11-05 The World Cities Report 2024 will advance a people-centred approach to climate action that promotes effective and inclusive climate action as a framework for building climate resilience in urban areas. The WCR 2024 advocates that people must be at the centre of any meaningful climate action. In this regard, climate action should not only contribute to mitigating GHG emissions, adapting and reversing the effects of climate change, but should ensure that people have sustainable livelihoods and stable incomes, have food security, access to clean water and other basic services including affordable healthcare, all of which will reduce the vulnerability to climate change.

The impacts of climate change are quite significant to the extent that adaptation and risk management can be powerful contributors to poverty eradication and sustainable development

Geographic Approaches to Climate Change and Mitigation: Urban and Rural Perspectives (Volume 1) Pir Mohammad, Shahfahad, Jesús Rodrigo Comino, Abraham R. Matamanda, 2025-10-04 This book provides an exploration of the geographic dimensions of climate change focusing on both urban and rural perspectives By examining the unique challenges and opportunities that arise in different environments it offers a balanced and holistic approach to climate mitigation It demonstrates how geographical analysis may guide and strengthen efforts to mitigate climate change by bringing together a variety of tactics case studies and research findings from around the world The main topics covered include urban planning and climate resilience rural land use and sustainability the role of geographic information systems GIS in climate modeling and the socio economic impacts of climate policies Special emphasis is placed on the interconnectedness of urban and rural ecosystems recognizing that solutions in one domain can have ripple effects in the other For instance the book explores how rural land conservation can support urban carbon sequestration efforts or how sustainable urban design can reduce the pressure on natural rural resources These topics are crucial as the world faces environmental changes Cities are responsible for the majority of global emissions yet rural areas often suffer the consequences of climate impacts Understanding the geographic factors influencing both regions is crucial to developing tailored effective mitigation strategies The book explores the innovative approaches such as the use of nature based solutions in urban areas or regenerative agriculture in rural settings that offer promising routes for sustainable development The problem addressed in this book is the lack of a unified geographic perspective on climate change mitigation By discussing urban and rural strategies it aims to encourage cross disciplinary collaboration and inspire actionable solutions that answer to the needs of diverse communities Climate change is a global issue but its impacts and solutions are deeply localized understanding these geographic issues is essential for policymakers urban planners landscape architects environmental scientists and community leaders Targeted at academics professionals and policymakers involved in climate change urban planning landscape architecture and environmental management this book provides readers with the insights needed to create impactful location specific strategies for a more resilient and sustainable future
