Impact of the COVID-19 pandemic on the education of students with disabilities in pre-university education

Zamira Hyseni Duraku*

Mirjeta Nagavci

Chapter Summary: This chapter presents the findings of the study which aimed to investigate the factors influencing the level of inclusion of children with disabilities in education, before and during the COVID-19 pandemic period and to explore the impact of related circumstances with the pandemic (e.g., social distance, online learning) in the well-being and daily activities of children with disabilities and their parents. Semi-structured interviews were conducted with experts in the field of rights of children with disabilities (N = 5) and with support staff for students with disabilities (N = 7). The study findings show that the pandemic period, home isolation, lack of socialization, change of daily routine and lack of services have negatively impacted the emotional state of children with disabilities, contributing to parental load and stress. The low level of inclusiveness and benefits have been influenced by many factors from the school learning process to distance/online learning during the pandemic. In addition to the findings from the current study and literature review, this chapter offers suggestions for improving the quality of education, inclusion and opportunities for children with disabilities with an emphasis on adapting curricula and teaching plans to individual needs, professional development of teachers, provision of services within the school and involvement and support of parents in the education of the child.

Keywords: COVID-19, Children, Disability, Online learning, Inclusion

Introduction

Although distance (online) learning has been implemented worldwide due to the spread of the COVID-19 pandemic (UNESCO 2020a), the demand to adapt this format to learners' individual needs and foster an inclusive and supportive online educational system are among world organizations' main requirements (e.g., European Disability Forum 2020; United Nations Children's Fund [UNICEF] 2020b, 2020c, 2020d). Lockdowns, physical distancing, and shifts in learning formats, as well as other

challenges of the future **Advances in Conservation and Utilization of Plant Genetic Resources** Svein Øivind Solberg, Maarten Van Zonneveld, Axel Diederichsen, 2024-08-20 Genetic diversity is the key to crop improvement and food security. There are more than 1500 gene banks around the world and genetic resources are maintained in nature reserves and on farms. Genetic diversity serves as the starting point for breeding crops with improved nutritional quality, higher yields, and better tolerance to abiotic and biotic stresses. However, genetic diversity also provides opportunities for diversifying farm and food systems. Utilization depends on access to material and information. However, many gene banks experience backlogs in characterization, evaluation, regeneration, viability tests, plant health monitoring, and information sharing. This research topic focuses on advances in plant genetic resource conservation and utilization.

Artificial Intelligence for .NET: Speech, Language, and Search Nishith Pathak, 2017-08-14 Get introduced to the world of artificial intelligence with this accessible and practical guide. Build applications that make intelligent use of language and user interaction to better compete in today's marketplace. Discover how your application can deeply understand and interpret content on the web or a user's machine, intelligently react to direct user interaction through speech or text, or make smart recommendations on products or services that are tailored to each individual user. With Microsoft Cognitive Services, you can do all this and more, utilizing a set of easy-to-use APIs that can be consumed on the desktop, web, or mobile devices. Developers normally think of AI implementation as a tough task involving writing complex algorithms. This book aims to remove the anxiety by creating a cognitive application with a few lines of code. There is a wide range of Cognitive Services APIs available. This book focuses on some of the most useful and powerful ways that your application can make intelligent use of language. *Artificial Intelligence for .NET: Speech, Language, and Search* will show you how you can start building amazing capabilities into your applications today. What You'll Learn: Understand the underpinnings of artificial intelligence through practical examples and scenarios. Get started building an AI-based application in Visual Studio. Build a text-based conversational interface for direct user interaction. Use the Cognitive Services Speech API to recognize and interpret speech. Look at different models of language, including natural language processing, and how to apply them in your Visual Studio application. Reuse Bing search capabilities to better understand a user's intention. Work with recommendation engines and integrate them into your apps. Who This Book Is For: Developers working on a range of platforms from .NET and Windows to mobile devices. Examples are given in C#. No prior experience with AI techniques or theory is required.

Research Methods for Public Administrators Gary Rassel, Suzanne Leland, Zachary Mohr, Elizabethann O'Sullivan, 2020-12-29 *Research Methods for Public Administrators* contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic

statistics to more advance techniques The basics of conducting experiments survey research case studies and focus groups are discussed Data organization management and analysis are also covered as are data analysis and hypothesis testing Descriptive and inferential statistics are discussed and illustrated with examples The book also includes a chapter on obtaining and analyzing secondary data data already collected for other purposes and a chapter on reporting and presenting research results to a variety of audiences This is a general textbook written primarily for students of public administration and practitioners in public and not for profit organizations It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies The material is discussed at a level to be accessible and with enough detail to be useful New to the seventh edition Additional and expanded material on qualitative research big data metadata literature reviews and causal inference New material on experiments and experimental research New examples and case studies including those dealing with public policy Expanded material on using computers for data management Information on new NSF and NIH ethics and protection of human subjects requirements for researchers New data sets and Power Point slides for each chapter *Internet Companion for Statistics* Michael D.
