Islamic Marketing Ćedomir Nestorović, 2016-05-28 This book analyzes the current Islamic marketing environment Since the Muslim world is extremely diverse in terms of economic development customs and traditions and political and legal systems it is vital for companies and marketers to analyze the environment before attempting to address these markets The author emphasizes that it is ineffectual to elaborate the distribution and promotion strategies if the market does not exist in terms of purchasing power or demographics if potential consumers do not believe that products and services answer their needs and demands or if there are political and legal barriers to companies wanting to enter these markets The book offers detailed insights into the economic socio cultural and politico legal environment in the Muslim world which are essential for marketers to understand and form the foundations of effective marketing strategies
