buildings transport infrastructure parks conservation areas etc beyond the profit principle has reached its limits in the 21st century Planning in this case would be reduced to a mere facilitator of market forces in the city be it gentle or authoritarian Yet in spite of these contradictions and outright impossibilities planners operate within contribute to resist or temper an increasingly neoliberal mode of producing spaces and places or the revival of profit driven changes in land use It is this contradiction between the serving of private profit seeking interests while actually seeking the public betterment of cities that this volume has sought to describe explore analyze and make sense of through a set of case studies covering a wide range of planning issues in various countries This book lays bare just how spatial planning functions in an age of market triumphalism how planners respond to the overruling profit principle in land allocation and what is left of non profit driven developments Architectuur Lokaal #08 , **Forum opinieblad van VNO-NCW.** ,2003 **Val en worp** Eduard Jan Dijksterhuis,1924 **Patentgesetz** Rainer Schulte,1987 **Plan** ,1981
