State, Labor, and the Transition to a Market Economy Agnieszka Paczyńska,2012-11-15 In response to mounting debt crises and macroeconomic instability in the 1980s many countries in the developing world adopted neoliberal policies promoting the unfettered play of market forces and deregulation of the economy and attempted large scale structural adjustment including the privatization of public sector industries How much influence did various societal groups have on this transition to a market economy and what explains the variances in interest group influence across countries In this book Agnieszka Paczy ska explores these questions by studying the role of organized labor in the transition process in four countries in different regions the Czech Republic and Poland in eastern Europe Egypt in the Middle East and Mexico in Latin America In Egypt and Poland she shows labor had substantial influence on the process whereas in the Czech Republic and Mexico it did not Her explanation highlights the complex relationship between institutional structures and the critical junctures provided by economic crises revealing that the ability of groups like organized labor to wield influence on reform efforts depends to a great extent on not only their current resources such as financial autonomy and legal prerogatives but also the historical legacies of their past ties to the state This new edition features an epilogue that analyzes the role of organized labor uprisings in 2011 the protests in Egypt the overthrow of Mubarak and the post Mubarak regime

inevitable the contributors bring a range of different approaches and perspectives to bear on the twin problems of democratic transitions in multinational societies and ethnic separatism and its origins The blend of analysis and insider experiences will make this book invaluable for all concerned with nationalism and ethnicity democratization and transitions in Eastern Europe Welfare States in Transition I. Collier,H. Roggemann,O. Scholz,H. Tomann,2016-01-18 Social policy in East and West finds itself today in the middle of a fundamental transition The former communist countries of Central and Eastern Europe and the successor states to the former Soviet Union are attempting to create the institutions needed for a modern market economy and a modern democratic welfare state At the same time the mature welfare states of Europe are struggling to solve the contemporary financial crisis of their systems of social entitlements Because of fundamental economic and demographic trends these systems will become increasingly difficult to sustain over the coming decades The contributors overwhelmingly agree that it would be mistaken policy to simply copy the institutions of Western welfare states to the Eastern economies in transition Instead one can learn much from the experience gathered over the past half century in Western welfare states **Aging within Transnational Families** Vincent Horn,2019-03-15 Aging within Transnational Families is the first book to provide a multi method approach to studying aging across borders By asking how why and to what extent do older Peruvians engage in transnational family ties and practices the book enhances our knowledge about aging across borders Drawing on the care circulation framework and the capacity and desire approach it explores the motivations of older Peruvians transnational involvement as well as the factors influencing the scope and propensity of their cross border practices From a lifecourse perspective the book asks how age relates to older Peruvian migrants integration into the host society and engagement in the sending of remittances and visits of family members in Peru Exploring the prevalence and structuring features of family related transnational practices against the backdrop of different migration regimes Aging within Transnational Families shows how policies affect transnational family configurations and the role of older people within them *Labor Economics Course Materials* ,1981 **Labor Economics, second edition** Pierre Cahuc,Stephane Carcillo,Andre Zylberberg,2014-08-01 The new edition of a widely used comprehensive graduate level text and professional reference covering all aspects of labor economics with substantial new material This landmark graduate level text combines depth and breadth of coverage with recent cutting edge work in all the major areas of modern labor economics Its command of the literature and its coverage of the latest theoretical methodological and empirical developments make it also a valuable resource for practicing labor economists This second edition has been substantially updated and augmented It incorporates examples drawn from many countries and it presents empirical methods using contributions that have proved to be milestones in labor economics The data and codes of these research publications as well as numerous tables and figures describing the functioning of labor markets are all available on a dedicated website www.labor-economics.org along with slides that can be used as course aids and a discussion forum This edition devotes more
