G. Tripathi, 2010-03. The fundamental aim underlying Cellular and Biochemical Sciences is to emphasize diversified topics of current interest to postgraduate students pursuing different courses in the area of biological sciences, including Zoology, Botany, Biochemistry, and Biotechnology. The text is also relevant to the students of Life Sciences, Biosciences, Cell Biology, Bioengineering, and Pharmacology. A total of 58 topics have been incorporated in the book, and some of the topics are rarely found in other books of Biology. New information has been introduced, which updates existing knowledge and enables the book to justify its claim as the most comprehensive text in the sphere of cellular and biochemical sciences at the postgraduate and competitive examination levels. Each and every chapter has been designed in a lucid and readable manner. There are references, suggested readings, long questions, and objective questions at the end of chapters for revision of topics.

current science and enduring concepts incorporating a tremendous amount of new findings but only those that help illustrate biochemistry's foundational principles. With this edition, students will encounter new information emerging from high-throughput DNA sequencing, x-ray crystallography, and the manipulation of genes and gene expression, and other techniques. In addition, students will see how contemporary biochemistry has shifted away from exploring metabolic pathways in isolation to focusing on interactions among pathways. They will also get an updated understanding of the relevance of biochemistry to the study of human disease, especially diabetes, as well as the important role of evolutionary theory in biochemical research. These extensive content changes, as well as new art and powerful new learning technologies, make this edition of Lehninger Principles of Biochemistry the most impressive yet. Fish and Fishery Products Analysis
Saleena Mathew, Maya Raman, Manjusha Kalarikkathara Parameswaran, Dhanya Pulikkottil Rajan, 2019-11-06

This novel and informative book discusses the various aspects of seafood quality. The book is divided into 7 broad sections, each tackling a different aspect. The first section covers the general aspects relevant to the nutritional quality of the fish and the various extraction protocols for macro and micro nutrients. The second section provides insights into handling and the principles of thermal and non-thermal processing techniques for commercially important fishery products. The quality standards and safety concerns in the seafood industry and consumption are discussed in this section. The freshness indices of the processed products, including biochemical, microbiological, and toxicological characteristics, are also included. The third section discusses the physico-chemical characteristics and quality parameters of potable water and ice. The fourth section includes the quality assessment of various toxicants related to seafood products. The fifth section deals with the specific aspects such as principle instrument and procedures of conventional and novel analytical instruments relevant to the seafood industry. The sixth section deals with the seafood waste management, including solid and liquid seafood wastes. Presently, there is a great awareness regarding environmental sustainable processing and preservation techniques. The final chapter discusses the bioactive compounds from underutilized marine sources, showing pharmaceutical and nutraceutical applications.

Dr. G. Chelladurai, *Surviving Cancer* John Poothullil, 2018-05-30

Surviving Cancer offers hope and a strategy for anyone who has been diagnosed with a solitary tumor. In reading these pages, you will learn that the body can continue living while accommodating a solitary cancer. There are actions you can take that may prevent it from spreading, even if there are complications. *Surviving Cancer* explains how you can change your diet and lifestyle habits to survive cancer, to keep it from metastasizing and spreading to other organs in your body. Most of all, it will explain how you can literally starve cancer cells, forcing them to disappear or die. The main focus of this book will teach you that diet is perhaps the key factor in defeating cancer, especially avoiding grains. Grains create enormous amounts of glucose in your bloodstream, and cancer cells thrive on glucose to survive and multiply. High blood sugar levels also encourage the body to release insulin, and again, this is a great danger to your cancer. Insulin promotes cell growth, including cancer cells. The book provides insightful information

on the causes of cancer how it forms how it may spread and what you can do to control the cancer and return to a healthy life The chapters also contain specific advice on avoiding exposure to environmental toxins the value of sleep exercise and stress reduction the use of spices in cooking building good bacteria in your gut and many other factors you can control that may help prevent a cancer from spreading to other parts of the body This book is for anyone who has cancer localized to a single site and not yet colonized in another part of the body It is also for anyone who believes they are at risk of cancer due to heredity lifestyle working conditions or for any other reason Surviving Cancer is also especially important for anyone with Type 2 diabetes with or without cancer to learn about the link between the two If you have diabetes this is an important cautionary book to read to prevent yourself from developing cancer
