

Module 1 – Drawing Set Organization

1.1 SHEET IDENTIFICATION

The sheet identification format typically used in traditional construction drawing sets includes, however, the electrical systems methods, including drafting, and all other associated rules necessary to making and organizing sheets. These techniques have also provided an opportunity to expand the use of the sheet identifier. Accordingly, the sheet identification format is a key part of V5.0.

1.1.1 Standard Sheet Identification

The sheet identification format is applicable to both manual and CAD drawings/printouts. It is consistent with standards established for a wide range of project types. The V5.0 sheet identification format standard uses consistent the following components:

- 1. The **discipline designator** – consisting of one alphabetical character and a hyphen or two alphabetical characters.
- 2. The **sheet type designator** – consisting of one numerical character.
- 3. The **sheet sequence number** – consisting of two numerical characters.

The use of the discipline designator identifies the sheet as a member of a project. A sheet type designator identifies the type information on the sheet is followed by the sheet sequence number.

Regarding the use of sheet sequence numbers, V5.0 allows two levels of sheet identification. Below is a list of examples of the sheet numbers used to set the context of the presentation of the drawings. Level 1 offers the simplest presentation format and would be suitable for all but the most complex projects. Level 2 provides guidance for complex or special types of projects. Refer to [V5.0 Appendix A – Discipline Designators, V5.0 Appendix B for examples of the two levels of sheet identification.](#)

Note that the hyphen in the Level 1 discipline designator is a required sheet hyphen in the presence of the second character. The hyphen is optional rather than a required part due to the use of the “00” substructure. The hyphen, if implemented, is recommended for sheet to replace the hyphen when substructure specifying content does not occur together in the name.

1.1.2 Discipline Designator

The first component of the sheet identification format, the discipline designator, is based on the building system or architectural discipline designators, which offer a single alphabetical character and a hyphen (used to separate alphabetical characters) used to:

The discipline designator denotes the category of subject matter contained on the sheet in the sheet description. It must appear:
