Harmonious Technology Pak-Hang Wong, Tom Wang, 2021-02-25 Technology has become a major subject of philosophical ethical reflection in recent years as the novelty and disruptiveness of technology confront us with new possibilities and unprecedented outcomes as well as fundamental changes to our normal ways of living that demand deep reflection of technology However philosophical and ethical analysis of technology has until recently drawn primarily from the Western philosophical and ethical traditions and philosophers and scholars of technology discuss the potential contribution of non Western approaches only sparingly Given the global nature of technology however there is an urgent need for multiculturalism in philosophy and ethics of technology that include non Western perspectives in our thinking about technology While there is an increased attention to non Western philosophy in the field there are few systematic attempts to articulate different approaches to the ethics of technology based on other philosophical and ethical traditions The present edited volume picks up the task of diversifying the ethics of technology by exploring the possibility of Confucian ethics of technology In the six chapters of this volume the authors examine various ideas concepts and theories in Confucianism and apply them to the ethical challenges of technology in the epilogue the editors review the key ideas articulated throughout the volume to identify possible ways forward for Confucian ethics of technology Harmonious Technology revives Confucianism for philosophical and ethical analysis of technology and presents Confucian ethics of technology as another approach to the ethics of technology It will be essential for philosophers and ethicists of technology who are urged to consider beyond the Western paradigms More broadly the volume will be of interest to students and scholars in the fields of philosophy science and technology studies innovation studies political science and social studies

Moral Design and Technology Bart Wernaart,2022-01-20 When should a surveillance system that is used in preventive policing sacrifice the privacy of citizens to prevent criminality What should be the impact of individual moral expectations when a social media platform designs an algorithm To what degree can we use technology driven deception in dementia care practices And can we create a moral compass for a dashboard society Over the last decade the impact of technological innovation has been unprecedented It has profoundly changed the way we participate and interact in society It has also led to new moral challenges Not only because of the technology itself but also because this technology is used in the context of a globalised world with a more prominent role for the private sector This can result in moral confusion individuals who alternately assume the role of citizen and consumer feel unable to influence the design of technology that has a strong impact on their core values Sustaining this moral confusion is in nobody s long term interest In this book we propose to overcome this moral confusion by using a bottom up design approach that incubates ethics when constructing new technologies This book is composed of four parts In the first part we focus on how to integrate moral decisions and morality in the design process of new technology In the second part we assess how moral design relates to related discourse including business ethics law and policy In the third part of this book various case studies are highlighted that focus on particular moral design issues at the crossroads of technological innovation in the public and private sector In the last part we look ahead and discuss what the future might look like if we use moral design as a central approach in creating new technology This book is relevant for IT and engineering professionals business leaders and policymakers with innovation in their

portfolios and students of applied science who are interested in the moral design of technology The chapters are written by experts and leading researchers in an attractive accessible and practical writing style Each chapter offers colourful examples and challenges the reader to critically think through moral decision making and the design of innovation
