New Era Of Management 11th Edition:

New Era of Management Richard L. Daft, 2014 *LEADERSHIP AND ORGANISATIONAL PERFORMANCE* Dr. Godwin C. Arikibe, 1901 Leadership is inherent in every being despite one's job profile. But qualitative training and other traits are very important for the right behaviours. Every follower possesses attribute of a leader but because these are somewhat concealed to lead effectively becomes a huge challenge to many. This book is as a result of many years of research. It focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours characteristics attributes and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes skills achieve behavioural complexity which are performance enhancing behaviours. Furthermore leaders are distinguished by their unique mental attitude particularly in four roles they play: motivation, vision, analytic and task master roles. Combination of these with other attributes and characteristics enhances the leadership complexity. This book is a useful material for those in the ministries, academia and organisations of different sizes. It's a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance.

Global Mergers and Acquisitions Abdol S. Soofi, Yuqin Zhang, 2018-03-19 This book primarily deals with corporate restructuring through mergers and acquisitions (MAs). It critically examines all functions that must be performed in completing an MA transaction. Domestic and crossborder MAs are very similar in many respects even though differences between them also exist. The book includes discussions of international finance and multinational financial management, the topics that arise in cross border MA transactions. Given the increasing importance of China as the second largest economy in the world and Chinese companies growing merger and acquisition (MA) activities globally, we devote the last two chapters of the book to China's outward foreign direct investment and cross border MA activities. Moreover, the second volume includes the case studies regarding Chinese foreign direct investment both in Greenfield and acquisition forms, give additional insights into challenging tasks of due diligence and post merger cultural integration that foreign investors face. The MA literature is a fragmented field of inquiry. This book brings together important practical insights from this vast literature in a short but cohesive form that has high managerial relevance.

The United States Catalog, 1925 **Rethinking Management** Boris Kaehler, Jens Grundel, 2025-08-27 The concept of management is well established and very familiar to scholars and practitioners alike. However, it is also very generic with no agreed upon definition and no consistency in the demarcation between it and its sub-concepts and other similar terms. Building on an in-depth analysis of literature, this book establishes a precise understanding of management and systematically integrates its sub-concepts of organization, governance, strategic management, human resource management, leadership and organizational culture. It thus provides a clear theoretical and conceptual framework helping researchers to theorize and practitioners to implement corporate management models.
