Functions of Language ,1994 **Talking and Thinking** David Butt,1989 This book written in the form of a conversation between a student of educational theory and a student of linguistics brings out the relationship between talking and thinking Their discussion can be divided into three parts the Saussurean theory of signs seen within different approaches to meaning the implications of sign theory in accordance with what thinking implies in specific communities and the way in which point of view can alter meaning within a particular community *Australian Journal of Reading* ,1991 The Western Classical Tradition in Linguistics Keith Allan,2007 The Western Classical Tradition in Linguistics examines ancient medieval post renaissance and modern conceptions of linguistics i e the study of language and languages It identifies a classical tradition to which modern linguistics owes a very clear debt For example Aristotle takes language to be A a symbolic system that represents B the world of our experience as it is contained within the mind He believed C the world is external to human beings who are all capable of D perceiving the same things within it Finally E Aristotle was only interested in form as a corollary of function A E have given rise to different developments in linguistics A is a premise for all linguists but has been developed perhaps to its limits in post Fregean semantics From the last quarter of the 20th century B has been pursued by cognitive linguists C was taken up by the speculative grammarians of the late middle ages who looked to the structure of God s world as informing the structure of universal grammar The rationalists of the seventeenth and eighteenth centuries took up D revising the interpretation of their speculative precursors to seek universal grammar in the God given rational minds of the human beings perceiving the world around them Chomsky reinterprets the rationalist doctrine to seek universal grammar in the human mind while eschewing the relevance of human perception of anything other than linguistic input Functional linguistics has picked up on E So today s formal linguists cognitivists functionalists and Chomskyites may often be at odds with each other but all tread in Aristotle s footprints within the western classical tradition There have been times when linguists stepped outside of the tradition but they nearly always borrowed from

research and theory on the semiotic linguistic aspects of the social world It situates critical discourse analysis as a form of critical social research in relation to diverse theories from the philosophy of science to social theory and from political science to sociology and linguistics First the authors clarify the ontological and epistemological assumptions of critical discourse analysis its view of what the social world consists of and how to study it and in so doing point to the connections between critical discourse analysis and critical social scientific research more generally Secondly they relate critical discourse analysis to social theory by creating a research agenda in contemporary social life on the basis of narratives of late modernity particularly those of Giddens Habermas and Harvey as well as feminist and postmodernist approaches Thirdly they show the relevance of sociological work in the analysis of discursive aspects of social life drawing on the work of Bourdieu and Bernstein to theorise the dialectic of social reproduction and change and on post structuralist post colonial and feminist work to theorise the dialectic of complexity and homogenisation in contemporary societies Finally they discuss the relationship between systemic functional linguistics and critical discourse analysis showing how the analytical strength of each can benefit from the other Sets out a new and distinctive theoretical grounding and research agenda for critical discourse analysis Interdisciplinary in scope Draws on a broad range of theories and approaches
