**Duelling Languages** Carol Myers-Scotton, 1993 The goal of this book a companion volume to Social Motivations for Codeswitching Oxford 1993 is to describe and explain intrasentential codeswitching the production of two or more languages within the same sentence Most linguists who do not study codeswitching think of it as belonging strictly in the domain of sociolinguistics Most codeswitching studies do indeed have a social aspect because they typically use naturally occurring performance data as their base This book however is just as much a study in grammatical theory as a study of language in use The specific research question addressed is this when speakers alternate between two or more linguistic varieties how free is this alternation from the structural point of view Carol Myers Scotton develops a model of the morphosyntactic constraints on codeswitching and concludes that the principles governing codeswitching are the same

everywhere      **Head First Data Analysis** Michael Milton,2009-07-17 Today interpreting data is a critical decision making factor for businesses and organizations If your job requires you to manage and analyze all kinds of data turn to Head First Data Analysis where you ll quickly learn how to collect and organize data sort the distractions from the truth find meaningful patterns draw conclusions predict the future and present your findings to others Whether you re a product developer researching the market viability of a new product or service a marketing manager gauging or predicting the effectiveness of a campaign a salesperson who needs data to support product presentations or a lone entrepreneur responsible for all of these data intensive functions and more the unique approach in Head First Data Analysis is by far the most efficient way to learn what you need to know to convert raw data into a vital business tool You ll learn how to Determine which data sources to use for collecting information Assess data quality and distinguish signal from noise Build basic data models to illuminate patterns and assimilate new information into the models Cope with ambiguous information Design experiments to test hypotheses and draw conclusions Use segmentation to organize your data within discrete market groups Visualize data distributions to reveal new relationships and persuade others Predict the future with sampling and probability models Clean your data to make it useful Communicate the results of your analysis to your audience Using the latest research in cognitive science and learning theory to craft a multi sensory learning experience Head First Data Analysis uses a visually rich format designed for the way your brain works not a text heavy approach that puts you to sleep      *Annual Report - Statistical Laboratory, Iowa State University* Iowa State University.
