Despite an explosion in the number of gyms, health foods, and activewear, we are more obese, less active, more stressed than ever before. We obsess over looking healthy, but our health is getting worse. Why did we start equating beauty with health? And is it possible to be fit and fat? We photograph ourselves and our food, but aren't sure whether we like the images until someone else likes them first. She explores the secret of long-term motivation for healthy diet and exercise and shares the scientific value of self-kindness for true physical and mental health.
