Science Experiments Review Setup:

Ethics and Experiments Scott Desposato, 2015-12-22 For most of political science's history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development

Frontiers in Earth Science - Editor's Choice 2017 Valerio Acocella, 2018-03-29 2017 has been an exciting year for our innovative open access journal Frontiers in Earth Science many new articles have been published and are now indexed in Web of Science ESCI new sections have opened for submissions including Solid Earth Geophysics and our Editorial Board has been successfully leading the peer review process and providing comprehensive reviews to our authors Have a look at our archive to read about the feeding habits of dinosaurs human influence on in the African humid period volcanic hazard models or how glaciers flowing into the ocean surrounding Greenland have changed over time Launched at the end of 2013 our Journal consists of several specialties whose number has increased with time and currently stands at 19 also including a few specialties co listed in other fields <https://www.frontiersin.org/journals/earth-science> The present selection is not exhaustive as new ones are being launched and or are under consideration for development This growth has been paralleled by a yearly increase in the number of contributions and the Editorial Board members reflecting the health of the Journal Now also indexed in Web of Science Emerging Sources Citation Index ESCI Frontiers in Earth Science is ambitious to become the leading open access journal in its field The idea of creating an Editor's Choice eBook has been in our minds for a while as we wanted to create an environment for the Chief Editors to highlight their choice of representative papers in the Journal we are happy to present now our first edition The eBook offers a quick though representative window into the different specialties giving additional visibility to some of the most interesting studies published in 2016 and 2017 It provides a glimpse into the state of the art of Earth Science on the cusp of 2020 Earth Science studies the different spheres of the Earth geosphere atmosphere

hydrosphere and partly biosphere and as such it provides a holistic perspective of our planet This discipline in addition to understanding our environment enables us to face major natural challenges such as improving the management of natural resources promoting environmental sustainability and forecasting and managing natural hazards Acocella 2015 and references therein On this basis the contributions grouped in this eBook even though appearing distinct in subject methods goal and impact should be considered as different aspects of the same system Indeed the selection of these contributions aims to capture a multidisciplinary and common understanding of our planet with its interconnected processes and challenges It is important to note that in many cases it has not been easy to select a representative study per specialty and thus the papers included in this eBook should therefore not be considered as the representative ones but rather as a concise selection of key papers We hope you enjoy reading our first edition of the Editor s Choice eBook Jessica Journal Manager and Valerio Field Chief Editor

Reviews of Accelerator Science and Technology Alex Chao,2012-02-20 Since their debut in the late 1920s particle accelerators have evolved into a backbone for the development of science and technology in modern society Of about 30 000 accelerators at work in the world today a majority is for applications in industry about 20 000 systems worldwide There are two major categories of industrial applications materials processing and treatment and materials analysis Materials processing and treatment includes ion implantation semi conductor materials metals ceramics etc and electron beam irradiation sterilization of medical devices food pasteurization treatment of carcasses and tires cross linking of polymers cutting and welding curing of composites etc Materials analysis covers ion beam analysis IBA non destructive detection using photons and neutrons as well as accelerator mass spectrometry AMS All the products that are processed treated and inspected using beams from particle accelerators are estimated to have a collective value of US 500 billion per annum worldwide Accelerators are also applied for environment protection such as purifying drinking water treating waste water disinfecting sewage sludge and removing pollutants from flue gases Industrial accelerators continue to evolve in terms of new applications qualities and capabilities and reduction of their costs Breakthroughs are encountered whenever a new product is made or an existing product becomes more cost effective Their impact on our society continues to grow with the potential to address key issues in economics or the society of today This volume contains fourteen articles all authored by renowned scientists in their respective fields

Expanding Perspectives on Open Science: Communities, Cultures and Diversity in Concepts and Practices L. Chan,F. Loizides,2017-06-20 Twenty one years ago the term electronic publishing promised all manner of potential that the Web and network technologies could bring to scholarly communication scientific research and technical innovation Over the last two decades tremendous developments have indeed taken place across all of these domains One of the most important of these has been Open Science perhaps the most widely discussed topic in research communications today This book presents the proceedings of Elpub 2017 the 21st edition of the International Conference on Electronic Publishing held in Limassol Cyprus in June 2017 Continuing the tradition of bringing

together academics publishers lecturers librarians developers entrepreneurs users and all other stakeholders interested in the issues surrounding electronic publishing this edition of the conference focuses on Open Science and the 27 research and practitioner papers and 1 poster included here reflect the results and ideas of researchers and practitioners with diverse backgrounds from all around the world with regard to this important subject Intended to generate discussion and debate on the potential and limitations of openness the book addresses the current challenges and opportunities in the ecosystem of Open Science and explores how to move forward in developing an inclusive system that will work for a much broader range of participants It will be of interest to all those concerned with electronic publishing and Open Science in particular
