**The EU Artificial Intelligence (AI) Act** Ceyhun Necati Pehlivan, Nikolaus Forgó, Peggy Valcke, 2024-12-03 The EU Artificial Intelligence AI Act A Commentary Edited by Ceyhun Necati Pehlivan Nikolaus Forgó Peggy Valcke As artificial intelligence AI systems increasingly permeate various facets of our lives there are growing concerns about their disruptive effects on society and the risks they pose to human rights democracy and the rule of law Accordingly the AI phenomenon has given rise to numerous governance frameworks at all levels of jurisdiction In this context it cannot be denied that the European Union s AI Act is the first legislation of its kind with global impact establishing horizontal rules for the development market placement and use of AI systems However grasping its subtleties and intricacies poses a formidable challenge This then is the first book to offer a reference guide and research tool providing the full text of the AI Act as published in the Official Journal of 12 July 2024 along with an in depth article by article commentary The commentary examines each article in sequential order ensuring a thorough understanding of every provision More than eighty prestigious scholars and top tier professionals all experts in the field collectively contribute an exhaustive exploration and analysis of the AI Act making this volume the guide likely shaping the Act s interpretation and application in courts and establishing it as a preeminent resource for legal determinations and academic research The authors include senior scholars legal practitioners judges and regulators from top law schools international law firms and EU institutions Their authoritative and respected opinions and diverse insights and perspectives will help to shape legal and regulatory frameworks for AI not only in Europe but worldwide Lawyers judges and other legal professionals will benefit from the book s lucid interpretation of the AI Act aiding in its application and compliance thus enhancing their ability to effectively practice and uphold AI related regulations Professionals working in interested in and willing to learn more about the field of AI will find thorough guidance making it an essential resource for anyone involved in AI development and systems design In addition policymakers and institutions across the globe will have the opportunity to learn from the EU s pioneering approach helping them craft their own AI policies and legislation

**Deconstructing Digital Capitalism and the Smart Society** Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on

three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future
